Tibet Riots May Aid Votes Iran Anti-Change Chinese Oil Ban

Lopsided Tallies Rebuke Tehran For Gulf Stance

By Tom Kenworthy Washington Past Service
WASHINGTON — Both houses

for Congress, angered by Iran's military actions in the Gulf, approved on Tuesday a ban on Iranian imports, primarily oil. On a 93-0 vote, the Senate ap-

proved a measure that would im-mediately halt further imports un-less the president determined that the ban would not be in the national interest. However, the president could delay the import prohibition only for six months.

The House then approved the

embargo, 407-5. Although there has been a sharp increase in U.S. imports of Iranian oil in recent months, supporters of the ban conceded that it would be little more than a symbolic gesture unless other oil-importing nations followed suit.

"What it says to me is, we can assuage our anger, we can make a etatement, but we won't solve our problems until we make ourselves energy independent," said the meaker of the House, Jim Wright Texas.

Nonetheless, lawmakers said it was vital for the United States to do what it could to prevent Iran from using the hard currency degived from oil sales to fuel its proionged war with Iraq and to lay mines that threaten U.S. shipping and naval forces in the Gulf.

The Senate minority leader, Bob Dole of Kansas, said some Reagan administration officials were op-

"If rumors are to be believed, there continues to be opposition to this import embargo in some parts of the administration, especially in the State Department," said Mr.

"So it is doubly important that the Congress go on record over-whelmingly in favor of an embargo and present the question to the admstration in a fashion that it monot be ducked."

Mr. Dole : 251 week sponsored a Diplomats Say Pact Would Hurt U.S. Bid to Isolate Gadhafi similar ban that was attached to a military authorization bill. But Mr.

cialists, say leaders who are cool to the liberalization effort are likely to seize upon the disturbances last week as a major policy failure, for which officials who support the program should be blamed.

The timing of the disturbances in Tibet, which began Sept. 27 with a small anti-Chinese demonstration and grew more serious last Thursday with clashes that left several people dead, is crucial because the Communist Party is scheduled to hold its 13th party congress in the last week of October in Beijing. The party's Central Committee will meet before then, and major leadership changes are expected.

A diplomat said that the slate of new officials had probably already been decided but that some

changes could still be made if hardliners show they have enough sup-

At the beginning of this year, hard-liners in Beijing exploited an-other kind of disturbance — student demonstrations in several cit-

ies - to mount an attack on "bourgeois liberalization" and officials who tolerated it. That campaign toppled the Communist Par-ty leader. Hu Yaobang, but appeared to lose its momentum by early summer.

The analysts said the unrest in Tibet would probably not lead to major recriminations or purges, as happened after the student demon-

But they noted that high-level personnel changes were expected soon in China's government and Communist Party and suggested that hard-liners might triptle take advantage of the situation to dis-credit officials who have backed liberalization and to seek promotion of members of their own camp.

Byron S.J. Weng of Chinese University in Hong Kong said: "Most likely, the conservatives will say: Look at what you've done. You are responsible, and this is what your open-door policy has achieved."
But Mr. Weng also noted that

Senate Panel *Votes* 9-5 Against Bork

The Associated Presi

WASHINGTON — The Senate Judiciary Committee voted 9-5 on Tuesday to recommend that the full Senate reject the nomination of Judge Robert H. Bork to the U.S. Supreme Court.

A prominent Southern Demo-crat and a fifth Republican joined the opposition.

Senator Joseph R. Biden Jr., Democrat of Delaware, the committee chairman, said he did not see "any reasonable prospect that Judge Bork will be confirmed."

The vote left President Ronald Reagan with the option of carrying the fight to the Senate, where Democrats say they have the votes to kill the nomination, or withdrawing the appointment, possibly at Judge Bork's request. Mr. Reagan insisted at the White

the fight. But his spokesman said that "it's tough" to win now.

Some Democrats were openly urging Mr. Reagan to find a re olacement nominee.

What hurt Judge Bork's chances even more than the defeat in committee, which was anticipated, was the decision by Senator Howell Heslin, Democrat of Alabama, the lone Southerner on the panel, to announce he would oppose Judge Bork, 60, who sits on the U.S. Court of Appeals for the District of

White House officials had been hoping to use a "yes" vote from Mr. Heffin, a former Alabama Supreme Court justice, to attract other conservative Southern Democrats to Judge Bork's side.
Mr. Hellin said a seat on the

Supreme Court was "too important to risk a person who has continued to exhibit - and may still exhibit - a proclivity for extremism. The Judiciary Committee recom-

mended that the full Senate reject the nomination when it comes up for a vote, probably within two

Before the vote, Mr. Reagan re-jected all talk of giving up. "There's See BORK, Page 4

U.S. Issues a Firm Guide on Fighting Cholesterol

diplomats say.

council

The guidelines, released Monday, are aimed primarily at physicians, who would have to supervise treatment. They could affect more than a quarter of the adults in the United States, or more than 40 million Americans. Almost

The guidelines urge that all Americans, starting at age put on strict diets and, if necessary, drugs they might have

attacks or strokes. They are consistent with previous cholesterol recommendations issued by panels of experts and health organizations. But they go far beyond previous suggestions in proposing specific steps for testing and treating people. For the first time, the federal government has spelled out exactly how people with high cholesterol levels should

be treated. The treatments start with a cholesterol-lowering diet for three months, followed, if necessary, by a more stringent diet for three months. If these measures fail, the guidelines recommend "first choice" drugs, followed by other drugs or combinations of drugs.
A drug called lovastatin, which was hailed as a major

to flesh out previous suggestions with more specific recommendations, telling doctors and their patients exactly

cholesterol to safer levels. A similar campaign was begun in the 1970s to reduce high blood pressure.

"Medical practice is going to undergo a major change on the basis of this report," predicted Dr. DeWitt S. Goodman, professor of medicine at Columbia University's College of Physicians and Surgeons, who was chairman of the panel that prepared the recommendations.

Education Program, a cooperative effort sponsored by the National Heart, Lung and Blood Institute, a federal agency, in cooperation with 23 major medical associations and health organizations, including the American Medical Association, the American Heart Association and the American College of Cardiology.

Many of the organizations announced plans to educate

Some critics charged that the government was pushing too fast to lower cholesterol levels on the basis of studies

Some critics have warned that diets designed to lower cholesterol could deprive some people, particularly ado-lescents, of needed fats, and others have argued that cholesterol reduction is of minor importance in preventing heart attacks compared with giving up smoking or lower-

ing blood pressure.

The recommended "Step 1 diet" calls for reducing total fat to less than 30 percent of caloric intake, saturated fat to less than 10 percent of calories and cholesterol to less than 300 milligrams a day. The diet is generally consistent with

ation for the general public. The guidelines recommend intense medical supervision only for those whose total cholesterol levels are high, at 240 or above, or those in the "borderline" category who have definite coronary disease or other risk factors, such

as smoking or obesity.

Such high-risk individuals are urged to undergo a test called lipoprotein analysis to determine the level of their blood cholesterol that is carried by low-density dipoproteins. Such LDL-cholesterol has been cited as the chief factor in causing fatty deposits to accumulate on artery

Levels of LDL-cholesterol below 130 milligrams a deci-liter are considered "desirable." Those from 130 to 159 are deemed borderline, and those 160 or above are considered

The recommended treatment for high-risk individuals starts with the Step 1 diet, under medical supervision, with blood cholesterol levels remeasured at four to six weeks and at three months. The diet also seeks to reduce calories

cholesterol intake to less than 200 milligrams a day. The help of a registered dictician is recommended. If six months of dieting fails, the guidelines recommend that drugs be considered in addition to continuation of the

A Trace of Chernobyl Persists in Europe's Food

By Barry James

International Herald Tribune PARIS - Nearly 18 months after the world's worst civilian nuclear disaster, what one European Community official describes as "odd pockets of contamination" keep showing up in Western Eu-

rope's food supplies. Amounts of radiation exceeding norms set by the EC are being detected in foods ranging from mush-rooms in France and mutton in Britain to reindeer meat in Sweden, fish in Finland and even hazelnuts in Turkey, according to environmentalist groups, some government officials and spokesmen at the 21-nation Council of Europe.

But, responding to nongovern-mental warnings about mushrooms in France, the official Center for Radiation Protection calls the information "alarmist." A spokesman said, "There is no health reason caused by radioactivity to justify any restriction on the consumption of mushrooms."

Reports of radioactive mushrooms in France and an official warning about mushrooms in West Germany are the latest signs of

lasting fallout from the Chernobyl

nuclear accident. According to France's Independent Regional Committee for Information about Radioactivity. known as CRII-RAD, many of the wild mushrooms that are a feature of French gastronomy each au-tumo are tainted by radioactive ce-

sium-137. According to CRII-RAD, the degree of radioactivity varies according to the mushroom variety, the locality and the type of soil. It said one specimen of yellow bolerus registered a radioactive level of 2,450 becquerels per kilogram (2.2 pounds) of fresh mushrooms. The European Community allows a maximum of 600 becquerels per kilogram.

One becquerel equals the emission of one gamma ray per second. Because there are 10 kilograms of fresh mushrooms in a kilogram of dry mushrooms, and radioactivity is not reduced in the drving process, there are 24,500 becauerels in a kilogram of dry yellow bolenus. according to Christian Courbon. an expert at CRII-RAD's head-

Unions in Chile Call National Strike 🚜

SANTIAGO (Reuters) — Chilen trade unions planned to hold the first opposition challenge to the military government of President Augusto Pinochet in more than a year with a national protest strike scheduled for

wednesday.

The stoppage, called by the National Workers Command, is imended to press demands for wage increases and to protest the military's monetarist economic policies. Diplomats expect a muted response from Chilean workers, who can be dismissed for taking part in illegal strikes. The protest has been linked by union leaders to an opposition campaign for free elections in Chile.

House Backs Airline Consumer Bill

WASHINGTON (NYT) - The House of Representatives approved a

WASHINGTON (NYT) — The House of Representatives approved a package of consumer-protection measures Monday for airline passengers. The package would require airlines to compensate passengers for lost or delayed baggage, provide more time between connecting flights and notify passengers promptly when flights will be delayed.

The airlines would also be required to post on-time performance records for flights. It was the first important airline measure to be approved by either house of Congress since the recent rise in consumer complaints over performance and concerns over safety, much of it these consequence of deregulation of the industry in 1978.

consequence of deregulation of the industry in 1978.

Similar legislation is pending in a Senate committee, and passage by the Senate, which is expected, would set the scene for a confrontation with the White House, which is expected to oppose new restrictions on

Transportation Strike Disrupts Rome

ROME (AP) — Romans battled huge traffic jams, searched for taxis or simply stayed home Tuesday as a walkout by bus and subway workers brought public transportation to a halt in the Italian capital. The city urged residents not to drive their cars unless absolutely necessary, fearing a disaster if the 1.6 million vehicles registered in the city were used. Unions called the 24-hour strike to press the local transport companies to renew a contract that provides for pay increases in return for increased productivity.

Yugoslav air controllers are on a slowdown strike to protest low was the Politika newspaper reported Tuesday. As a result, domestic flights last longer and airplanes use up more fuel, Politika said quoting Yugoslav

disrupted train service in New England and New York ended when a judge issued a back-to-work order Monday. Amtrak is the U.S.-subs dized passenger rail service.

U.S. Defends Its Plans On Chemical Weapons

WASHINGTON — The United effort to match the magnitude of States defended on Tuesday its the Soviet effort," he said, "but plans to produce chemical weapons only a credible deterrent and one and rejected speculation that the which will raise serious doubts in superpowers could reach agree-From all the outward signs, Mr. ment this year on a treaty banning as to the utility of initiating chemi-

cal warfare." He also faulted Moscow for failing to disclose sufficient data on chemical stocks, including the location, types of munitions and destruction plans for old weapons.

Some officials and observers have suggested that the United States and the Soviet Union, which have agreed in principle to a treaty abolishing their intermediate-range nuclear forces, could also sign a chemical weapons treaty this year. But Mr. Redman called such speculation unrealistic.

the minds of the Soviet leadership

There are still many difficult issues to resolve," he said. His remarks, at the daily department briefing, were intended to counter recent Soviet efforts to show the West that Moscow wants

to destroy chemical weapons.

At a news conference Monday, a Soviet general said U.S. plans to produce binary weapons, which contain two chemical agents that are lethal only when combined, could wreck chances for an interna-

tional chemical arms agreement. Max L. Friedersdorf, chief U.S. representative at the Geneva talks on chemical weapons, attended the Moscow news conference but was

After President Ronald Reagan took office in 1981, he waged a long and ultimately successful bettle to win congressional funding for the new generation of binary weapons. Mr. Redman stressed that during the U.S. moratorium on chemical arms production, the Soviet Union "undertook a massive buildup" of its chemical weapons stockpile,

which some officials estimate exceeds 300,000 tons. He reaffirmed a U.S. commitment to an effective and verifiable chemical weapons ban and said a seventh round of U.S.-Soviet nego-

tiations is set for December. But, he said: "It's hard to set any artificial deadline and we aren't setting that. What we're looking at is a good treaty and one that re-solves the kind of issues that we've been talking about effectively."

Mubarak Marks War Anniversary After Re-election

President Hosni Mubarak of Egypt, who on Monday won a second six-year term, standing at

attention with top military officials Tuesday to mark the anniversary of the start of the 1973 Middle

Eastern war. Mr. Mubarak, 59, who was the only candidate in a referendum and had wide support

even among opposition groups, won 97.12 percent of the vote, with turnout put at 88.47 percent.

UNESCO, Gisele Halimi, said dures.

After five and a half hours of cause her government had ordered sions, delegates said her to vote against a new term for Mr. M'Bow. Mrs. Halimi said she was quitting in protest at France's decision to back Mr. Yaqub Khan.

Mrs. Halimi, a lawyer and feminist activist, was appointed to the Paris-based agency by President François Mitterrand. Her influ-ence over French policy in the agency has declined since the election of a right-wing government headed by Prime Minister Jacques Chirac last year.

Mrs. Halimi said she could not support the candidate of a govern-ment which she said had repeatedly violated human rights.

Solidarity Accused Of Bid to Smuggle Arms Into Poland The Associated Press

WARSAW — The chief govern-ment spokesman said Tuesday that the banned Solidarity union movement was responsible for what he called a terrorist shipment into Poland of weapons, tear gas, listening devices and printing materials.

The spokesman, Jerzy Urban.

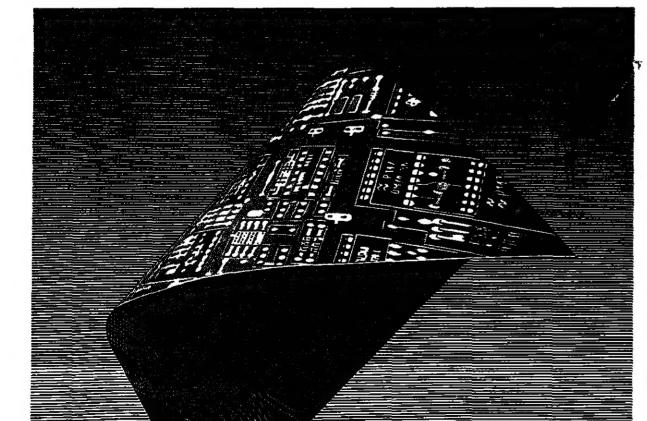

said the shipment, along with let-ters implicating Solidarity members, was in a trailer brought from Sweden and seized by security

sweden and seized by security agents in the Baltic port city of Gdansk on Sept. 30.

The accusation was made slightly more than a week after Vice President George Bush met with leaders of Solidarity in Warsaw, and during a week when the government is to announce major economic and political changes.

Janusz. Onyszkiewicz, national

spokesman for the union, denied Tuesday that Solidarity would have anything to do with importing weapons or tear gas.

Corporate Finance and the Deutsche Bank Group. Resources that get the job done.

It means employing, or creating, the most efficient financing instrument. It requires direct placement capability in every important currency, as well as a worldwide network that can distribute even the largest issues. Finally, it demands a demonstrated commitment to maintaining a liquid and price-competitive secondary market.

The Deutsche Bank Group is a world leader in corporate finance, because

time and time again, we apply whatever resources we need to get the job done. In fact, last year our clients relied on us to lead-manage euroissues valued at over US\$ 12 billion.

For corporate finance, as well as other investment and commercial banking services, consider using the resources of one of the world's leading banks.

Contact the Deutsche Bank Group office nearest you.

Population Trends Are Back to Normal

U.S. population shifts appear to have settled back into the his-toric migration to the South and West after being skewed by a de-cade of economic dislocations, according to Census Bureau fig-Michigan, which lost nearly 200,000 people from 1980 to 1985

while the auto industry was re-

structuring, lost only 4,000 peo-ple to other states from July 1985 to July 1986. Texas, which gained more than 400,000 new residents a year at the peak of its oil boom and saw the torrent ebb to a trickle in the bust that followed, has gained more than 100,000 people in each of the last two years.

Salvadoran Rebels And Duarte Agree On Cease-Fire Panel

SAN SALVADOR -- The govleón Duarte and leftist rebels ended a two-day meeting Tuesday with an agreement to form a commission to seek a cease-fire in El Salvador's cight-year-old civil war.

talks would not resolve the major political and ideological differences, and a joint communique announcing the commission appeared to bear out their forecasts.

Representatives of the insurgent Farabundo Marti National Liberation Front and the Salvadoran govemment started talks Sunday in an effort to comply with the regional peace accord that is intended to end insurgencies in El Salvador,

Guatemala and Nicaragua. in statements after the negotiations, rebel leaders raised doubt about a cease-fire because of the differences. But Mr. Duarte said that if the commission failed, he would "assume a historic chal-lenge" and ask his army to declare

e-fire on its own. The communique was read by

the archbishop of San Salvador, Arturo Rivera y Damas, at the end emment of President José Napo- of a 15-hour negotiating session that began Monday morning. The talks marked the first time in three years the two sides had officially

Both sides achieved the limited Both sides had predicted that the goals they had set for themselves. Mr. Duarte got the insurgents to agree to seek a cease-fire within the framework of the peace accord. The rebels obtained a continuing negotiating forum with the government in the form of the commis-

"It took us almost three years to get a dialogue started, and we achieved it," said Guillermo Ungo, a leader of the rebel delegation.

The cease-fire commission, to be made up of four members each from the government and an umbrella organization representing five armed guerrilla groups, will have until Nov. 4 to present its first report and an additional 120 days to complete its work That timetable meets the re-

quirements of a peace plan signed by five Central American presidents in Guatemala on Aug. 7.

A Salvadoran woman behind barbed wire near the Vatican diplomatic mission as government officials and rebels met.

By Gina Kolata New York Timer Servee NEW YORK — Science is still a Extensive toxicological tests in pain, which could explain sore animals have shown it to act "with throats. Dr. Gwaltney, who has been the property of the pain and the

long way from a cure for the common cold. But maybe that does not matter so much anymore.

For the first time, researchers think they may have found the substance that causes cold symptoms. Even better, they think they have found a drug that blocks its action.

People who used the drug would still have the cold, but without the stuffy nose and sore throat that make it such a miserable ailment.

"I'm not going to stand up it public and say that it will work," said Dr. David Proud of the Johns Hopkins University School of Medicine. "But that's the hypothe-

Dr. Proud, Dr. Robert Naclerio of Johns Hopkins and Dr. Jack Gwaltney of the University of Virginia have new evidence that cold symptoms are caused by kinins, normal proteins that cold viruses prompt the body to produce.

It should be possible to administer the kinin-blocking drug in a nasal spray, they said.

The drug would prevent kinins from dilating blood vessels and sending pain messages, the normal functions of these proteins. If the treatment worked, cold

mptoms would be alleviated. Moreover, because patients would still have their colds, they would develop antibodies. Thus, they would be protected from the particular strain of cold virus the next time they encountered it.

Dr. Proud, Dr. Naclerio and Dr. Gwaltney are awaiting approval from the Federal Food and Drug Administration to start testing this drug, called a bradykinin antagonist on volunteers.

The drug was developed by sci-entists at the University of Colorado who wanted to use it for research purposes and is licensed by Nova Pharmaceuticals in Balti-

> "We found only kinins," said Dr. Proud, The kinin work comes at a time when "there has not been a whole lot of interest in the common cold," Dr. Couch said, adding that he be-lieved that scientists had begun to

The problem is that as many as

as to make a cold vaccine virtually

Even without a vaccine, it is still possible that people exposed to a cold could take measures to protect

Dr. Couch and others, including Dr. Gwaltney, discovered that in-terferon can do this, at least for rhinoviruses, a class of viruses that is responsible for 30 to 40 percent

When the interferon results were made known in early 1986, they seemed quite promising. Dr. Gwaltney recalled.

"Our original idea was that you could spritz interferon into your nose once a day all winter long and never get a cold." he said.

But interferon turned out to have unacceptable side effects when people used it for more than a week. Volunteers reported that their nose was irritated, itching and burning and that they had bloodtinged nasal mucus.

"The side effects were worse than the symptoms of the cold." Dr. Gwaliney said. The kinin discovery, then, may provide new options.

Dr. Gwaliney pointed out, how-ever, that although the researchers have repeated their initial studies and are certain that kinins are there, what they have is an association, not yet a proof of cause and

Chinese Police Arrest 60 Protesters, Beating Many, in Tibet's Capital

Compiled by Our Staji From Dupatches LHASA, Tibet -- Chinese police arrested more than 60 demonstrators Tuesday, beating many with sticks and rifles, after the protesters marched in central Lhasa.

The demonstration was the third in 10 days. On Thursday, a proindependence protest is believed to have left as many as 10 dead.

About 2000 people stood by at the regional government office compound as Chinese police and soldiers armed with AK-47 automatic rifles and automatic pistols herded the marchers into trucks. beating many of them.

About 100 protesters had marched from the direction of the Drepung monastery, Initial indica-tions were that all 100 had been arrested, but Western witnesses said later that a few marchers were arrested on the way and others left the march. About 60 continued on to the regional government office. where they were arrested.

The marchers were believed to onstrations. (AP. Uhave been Buddhist monks wearing Senate Voices Concern civilian clothes.

The Buddhists were demanding the release of 21 monks who were arrested Sept. 27 in Lhasa during a violent protest demanding Tibetan independence from Chinese rule. It was the first such incident in Lhasa in recent years.

There have been reports that the

monks plan to demonstrate Wednesday, the 37th anniversary of the Chinese occupation of Tibet. We firmly oppose and will try to firmly stop those kinds of riots. a Communist Party spokesman, nese violence in Tibet.

Wu Xingtang, said Monday in Beijing. He accused foreigners of advocating independence for Tibet. On Thursday, at least 2,000 Tibetans demanding independence burned a police station and police

vehicles and stoned officers. Chinese security troops were flown to Lhasa on Monday, and police erected barricades on the main roads to the Sera, Ganden and Drepung monasteries. An Associated Press reporter.

using a back road, reached Sera, four miles from Lhasa. Inside the monastery, more than 330 monks were mourning the deaths of two of the comrades shot Thursday. "We're not able to go out now."

said the abbot, who gave his name only as Tenzing. "They surround the place at night. Please, all of you Westerners, help us to become independent.

proponents of liberalization so soon after their campaign earlier this year apparently fizzled.

An Asian diplomat said there had already been high-level disagreements in Beijing about how Tibet should be treated.

In the Cultural Revolution, which began in 1966 and lasted for 10 years, Tibetan religion and culture were harshly repressed. In recent years, the government has deployed beginning in 1983 to tried to make amends by restoring counter the growing Soviet arsenal temples, increasing spending in the region and offering concessions such as allowing parents to have tion to help defend them. more children than would be tolerated elsewhere in China. The conciliation effort has been

most noticeable in the last two years, since the appointment of a new Communist Party secretary for the region, Wu Jinghua, a native of Sichuan Province,

The principal architect of the policy of conciliation with Tibet was Mr. Hu. the deposed party chief. Analysts said three of China's most prominent advocates of liberalization - Deputy Prime Ministers Hu Qili and Wan Li and Prime Minister Zhao Ziyang — were also associated with the policy and could be

NATO Planners Defend Missile Accord

By Robert J. McCartney

Washington Past Service BRUSSELS — NATO planners have concluded that the proposed U.S.-Soviet treaty to eliminate into upgrade NATO's battlefieldtermediate-range nuclear missiles would weaken Moscow's overall military capability by at least as a small gain for the Western alliance in the European nuclear bal-

The Soviet Union would give up more than three times as many nuclear warheads as the North Atlantic Treaty Organization in the nior NATO expert said was "not Atlantic Assembly. something to sneeze at."

would suffer a relatively greater loss in the ability to strike enemy airfields, command and control centers, and rear-echelon positions where troop reinforcements would gather in any war between the East bloc and the Western alliance.

lieved to be closer to the position of the NATO commander. General John R. Galvin, than to that of his predecessor. General Bernard W. Rogers, who was replaced by General Galvin in June, had argued that the allies were stampeded into

accepting the agreement.
"Clearly, we don't lose badly,"
said another expert at NATO headquarters in Brussels. "In some ways, we think we have a gain. They give up more targets than we

A major concern, however, is that the pact could create political momentum for additional nuclear disarmament accords that might eventually leave NATO vulnerable to the Warsaw Pact's perceived advantage in conventional forces.

A political question raised by the accord is whether it represents a downgrading of the U.S. commi-ment to defend Europe. The U.S. intermediate-range nuclear forces in Europe, or INF, which would be dismantled under the treaty, were of SS-20 missiles and to reassure European allies of U.S. determina-

Yet, there is sharp debate within the alliance over whether Warsaw Pact conventional forces are really superior to those of the Western alliance. The International Institute of Strategic Studies in London judges the conventional forces of both bloes to be in rough parity. While some NATO military

commanders are unhappy about losing 108 U.S. Pershing-2 missiles under the treaty, the United States would still retain the ability to hit Soviet territory from Europe with submarine-launched missiles and bombs carried by F-111 aircraft based in Britain. Eliminating the Pershing-2 mis-

sile force based in West Germany was widely considered Moscow's chief military goal in the negotia-tions on medium and shorter-range nuclear arms. The Pershingwith a range of 1,100 miles (1.800 kilometers), is regarded as NATO's fastest and most accurate weapon capable of striking Soviet soil.

The U.S.-Soviet agreement in principle would eliminate only ground-based missiles with ranges of 300 to 3,500 miles, which are

The planned elimination of in- sailors.

range missiles and airborne nuclear

weapons systems during the 1990s. The major potential liabilities much as NATO's and may result in for the Western alliance in the proposed treaty are political rather than military, according to officials in Brussels and at NATO's military headquarters in nearby Mons.

"In purely military terms, there is no question that we gain," said Martin McCusker, director of the agreement, an advantage that a se-military committee of the North

NATO experts expressed special The Soviet Union consequently satisfaction that the treaty would reduce the threat posed to the alliance's 35 operational airfields, and to ports such as Rotterdam and Aniwerp, where U.S. troop reinforcements would arrive in case of war. But the Soviet Union, like the United States, would retain the The planners' assessment is be- ability to hit those targets with oth-

> Under the agreement, each side is to scrap all land-based missiles with ranges shorter than those of also have the advintercontinental ballistic missiles, called "visibility."

termediate-range forces, according to both civilian and military experts at NATO, makes it more important than before the first state of battlefield-range or tactical missiles. NATO will lose about 480 specifical transfer of the first state currently deployed nuclear warheads. Moscow, by contrast, would destroy more than 1,500.

Perhaps the biggest problem is that the treaty would eliminate the missiles considered ideal for making a "demonstration" shot early in a war. Such a shot would seek to persuade Moscow to call off an invasion of Western Europe by Warsaw Pact conventional forces.

In this scenario, a single missile would be fired at a military target on Soviet territory to show Moscow that NATO was willing to use nuclear weapons to defend Europe. The Pershing-2 missiles and to a lesser extent, the ground-launched cruise missiles, serve this purpose better than the alternatives allowed by the treaty, NATO experts and private analysts said.

Intermediate-range missiles are more accurate than submarinelaunched or airborne weapons.

The weapons to be dismantled also have the advantage of what is

cannot easily be withdrawn from Europe. 35 submarines or aircraft can. They therefore are seen as havcan. They increase an accordant hav-ing a particularly good deterrent role: If the Societs were overun-ning West Germany, NATO would have to "use them or lose them."
But NATO political and military

leaders express confidence that the United States would be willing to use other types of nuclear weapons if necessary to protect Europe, "I don't know a senior U.S. offi.

cial. Republican or Democrat, who doesn't know that the security of the United States is totally tied up in the security of Europe," a senior NATO planner said. A final advantage of the interme-

diate-range weapons is that NATO planners believe that they could use a single Pershing-2 or cruise micsile, rather than another nuclear weapon, with somewhat less risk of triggering an all-out nuclear war As intermediate-range, Europe-

land-based and thus somewhat an-based weapons, the missiles more accurate than submarine would carry the "message" that NATO was interested in bringing a European war to an end rather than & in raising the nuclear stakes to the strategic level.

OIL: Congress Approves Import Ban GADHAFI:

In addition to the 7,000 becquerels of radioactivity found in the average adult from natural sources. researchers have found an additional 600 becquerels resulting from the Soviet accident.

Mr. Bengtsson said this still was only about half the increase registered after nuclear tests in the atmosphere in the 1960s. Considerably higher increases, up to 100,000 becquerels in adults

in isolated cases, have been recorded in Lapland. "We tell them to be careful what they eat." Mr. Bengtsson said, noting that in Lapland, radioactivity has been concentrated in lichens and berries and is passed to humans through consumption of rein-

deer meat. Many of the fish in lakes

in Sweden and Finland also are beavily tainted, he said. In Brussels. Mr. Brenton said that because of the unexpectedly long duration of the post-Chernobyl effects, the European Community plans to replace the emergency food controls that were applied haphazardly after the accident. The controls, which expire at the end of October, would be replaced with a system of permanent measures establishing acceptable safety levels

for a variety of foodstuffs. "Europe is a group of relatively small countries with a lot of trade among themselves," Mr. Brenton said. "We want to keep that trade as untrammeled as possible, and that is why it is so important to have a uniform set of rules."

The subject is likely to come before EC foreign ministers when they meet Oct, 19 and 20, he added.

But experts have not agreed on where to draw the line. West Germany has said that in the absence of agreement, it will continue to enforce the existing level of no out, will continue to be present for more than 600 becquerels a kilo-

REGISTRATION INFORMATION

The fee is £595 (plus VAT is 15% £-9.35. total £684 25) or the equivalent in a convertible currency for each participant. This includes lunches, a cockrail reception and post-conference documentation. Fees are payable in advance of the conference and will be returned (less £50 administration charge) for any cancellation postmarked on or before October 12. Cancellations postmarked later rhan October 12 will be tharged the full fee.

Please return the registration form to: International Herald Tribune, Conference Office, 63 Long Acre. London WC2E 9JH, or telephone (441) 379 4302 or telex 262009.

Substitutions may be made at any time. Pan Amie the obtained carmer for the co and a offering a special service for all delegates tracelling from the United Scates. For further details please call Barbara McConnell 1-500 327 1500 Ref. CVN 67104 TELEPHONE: .

CONFERENCE LOCATION Royal Garden Hotel, Kensington High Street, LONDON W8 4PT, Telephone (441) 937 8000. Telex: 263151. A limited number of rooms has been reserved for participants at preferential rates. Reservations must be received by October 5. Please contact the hotel directly. CONFERENCE REGISTRATION FORM Please enrol the following participant for the Oil Conference. Please invoice. Check enclosed. FIRST NAME: __ ADDRESS: _____ CITY COUNTRY: __ 7-10-87

NEW DELHI - Tamil separatist guerrillas killed eight captive Sr. I mkan soldiers and three government officials Tuesday in their stronghold in northern Sri Lanka, in an upsurge of violence that threatened to undermine an Indian-backed peace agreement,

The Liberation Tigers of Tamil Felam said the slayings were in revenge for what they characterized as the forced suicides of 12 of their men, including two regional leaders, who swallowed cyanide pills Monday as government troops were putting them on a flight from the Jaffna Peninsula to Colombo,

Officials in New Delhi acknowledged that the two-day toll had dealt a severe setback to efforts of the Indian peacekeeping force in forcefully, but that is not our style. Sri Lanka to bring an end to the Once you shoot an arrow you can't

violence that has shaken the counget it back and you can't be sure it

Three government soldiers were reported to have been wounded in attacks by the Tigers on two army camps on the peninsula.

"It will take us weeks to try to get back to where we were" in progress toward ending Sri Lanka's ethnic strife, said an Indian official. Other observers said the sudden

surge of violence, including the fa-tal shooting of an Indian soldier late last week, had placed India's peacekeeping effort in a precarious There were no signs that India

will do what you want it to do."

The cyanide deaths at Jaffna's

Palaly airbase Monday and the killings of the soldiers Tuesday underscored the fanaticism of the Tigers, the main Tamil guerrilla group, and the difficulties in putting the accord into effect.

Tiger guerrillas, many in their teens, often wear cyanide capsules and yow to commit suicide rather than be taken alive. Very few have ever been captured.

A peace agreement signed two months ago by President Junius R. Jayawardene of Sri Lanka and Prime Minister Rajiv Gandhi of India brought hopes of an end to the bloodletting between Sri Lanka's majority Sinhalese community "Neither side really wants us to and its minority Tamils, whose leave," said an official. There is a guerrillas have been fighting for a separate Tamil state.

Indian officials say they have succeeded in getting Tamil guerrilweapoury, including most of their machine guns and mortars.

"They no longer have the capability of carrying out guerrilla war-fare," said an official.

Yet a spate of small-arms at-tacks, many by one Tamil group against another, has left Sri Lankan authorities nervous. In addition, the Tigers refused to

endorse the peace accord until about a week ago, when they agreed to cooperate in forming a joint governing council for Sri Lan-ka's Northern and Eastern provinces, as called for under the ac-

Within a day, however, the group's leadership withdrew its en-dorsement of the makeup of the provisional council, drawing sharp criticism from Colombo and No Delhi. The action also opened the door to renewed violence.

Before Monday, the surge in vie lence was mostly in Eastern Province, which is divided almost equal-ly among Sinhalese, Tamil and Moslem Sri Lankans. Recent attacks there included four on Indian peacekeeping units, apparently by government irregulars or local police.

en into custody on a boat off the Jaffna coast, it became a test of the peace accord and the three major players under it: India, the Sri Lan-

leadership. Sri Lankan authorities insisted that the boat was carrying heavy weapons and was illegal under the

The Tigers insisted that their men carried only personal weap-ons, tacitly acceptable in the short run under the accord. They said the men would commit suicide if the Indian peacekeeping force allowed the government to move them from the main government base on the Jaffua peninsula, which is also the main Indian Army headquarters for Sri Lanka.

allowed to die," a spokesman for the group said, the Tigers "will not be bound to observe the cease-fire and cooperate with" Indian troops in "maintaining peace in the Tami

Just how the suicide scene oc corred Monday remains unclear. On Tuesday morning, according to reports from Colombo, the Tigers informed the Sri Lankan Army that the bodies of eight soldiers could be found at the Jaffna bus station. The soldiers had been cap-

tured March 23 at an outpost near

the town of Jaffna. Later, a police constable was reported killed in the town of Vavuniya, and the manager and deputy manager of a government-owned "Those are more than the usual cement plant on Jaffna's northern

PAN AM OFFERS THE ROOMIER, MORE COMFORTABLE BUSINESS CLASS.

DON'T YOU DESERVE MORE SPACE?

Of course you do. And that's just what you get in Pan Am's Clipper® Class across the Atlantic. We have six across seating, not eight like on some other airlines. And our seats are wider, giving you more room to spread out and work or to stretch out and relax. And knowing that Pan Am has one of the best on-time records should make you feel very relaxed, indeed.

AREN'T YOU ENTITLED TO A NEW INTERIOR?

We think so. That's why we're installing brighter lighting, and bigger storage bins for more carry-on space. And special decorator touches, like handsome new tweed seat cloth, make for an altogether better business environment.

AREN'T YOU WORTH EXTRAS LIKE A PRIVATE TERMINAL?

- Absolutely, Our Private Terminal at Kennedy Airport in New York was meant for your exclusive use. Securely away from the bustling crowds, you'll enjoy the convenience of personalized

service that sees to your every need.

AND COME TO THINK OF IT. HOW ABOUT FREE HELICOPTER SERVICE?

When business calls you into New York, our helicopter answers with flights from Kennedy right to the heart of midtown Manhattan. All this on Pan Am's Clipper Class. Service from over 30 cities in Europe to over 30 cities in the U.S. Plus extras that put our business class in a class by itself. Who deserves it more than you? For reservations and information call your Travel Agent or Pan Am.

to so many Tunisians?

The Real Story on Jobs

the White House is crowing.

The administration certainly can take credit for keeping a heavy foot on the fiscal accelerator, stimulating the economy by running its amazing budget deficits. But the country's capacity to sustain high employment with stable prices results largely from broad trends beyond the immediate control of policy. The real question is not who should get the credit, but whether Washington can contain the political forces

that would reverse the gains. A half century after publication of John Maynard Keynes's General Theory, it is no longer considered a feat for government to create jobs. The trick is to maintain high employment without pushing up wages and then prices. That goal seemed ever more distant after the 1974 and 1980 recessions. In the Carter years, it was conventional wisdom that the "natural" rate of unem-ployment, the minimum compatible with price stability, was on the rise.

Now it is clear that high unemployment resulted mainly from transient factors, nota-bly the difficulty of absorbing the huge babyboom generation into the labor force. There were more than 37 million births between 1955 and 1964, for instance, compared with 25 million between 1935 and 1944.

This bubble was further inflated by the dramatic increase in the proportion of women seeking work. In 1962, only 38 percent of adult women were in the labor force. By 1982, the figure had risen to 53 percent.

The coincidence of a suddenly tight world market for oil and the loss of hundreds of thousands of jobs to industrial imports completed the dismal portrait of an economy unable to provide

Unemployment in the United States inched down to 5.8 percent in September with hardly a whiff of inflation, and entries to the labor force are falling and New America's luck has turned. New entries to the labor force are falling and most workers displaced by imports have found other jobs. Meanwhile, foreign competition continues to discipline labor markets; business rarely offers wage increases greater than productivity gains,

even where labor is scarce. The stratospheric oil prices of the 70s generated sufficient supplies to render oil prices insensitive to modest changes in consumer demand. Other commodities are also in chronic glut. for a variety of reasons the Green Revolution, stagnant demand from Europe, the versatility of synthetic substitutes for fibers and metals.

All this suggests that the economy should be able to absorb millions of marginally qualified job seekers in the next decade, striking a mighty blow against poverty with-out new inflation. But a leaner, more flexible economy has made life harder and riskier for many businesses. The outlook for employment could turn dim if Washington succumbs to demands for a corporate safety net.

Congress has been sensitized to the inflationary threat posed by, say, tighter quotas on clothing imports or reregulation of air-lines. But other inflationary ideas have stirred too little alarm, like punishing countries that export commodities produced in the United States, carelizing U.S. food production and limiting cheap foreign ura-nium to a third of the domestic market.

Americans without portable skills on the money to attain new skills have been badly bruised by a decade of convulsive change. That sacrifice ought not to be rendered meaningless just as the fruits of economic restructuring come within reach of those most in need.

Reach Out to Mozambique

bique may not weigh greatly in the geopolitical scales, but this former Portuguese colony has become the object of an intense ideological tug of war. The argument is between those who consider Mozambique Marxist and Soviet-oriented, and therefore a fit candidate for liberation under the precepts of the Reagan Doctrine, and those who see in President Joaquim Chissano a lapsed or lapsing Marxist whose pragmatism and, above all, whose desperation to save his country from South Africa and from underdevelopment, make him a fit candidate for Western cultivation.

We think Mozambique is a country well worth the West's reaching out for. Certainly President Chissano, who was received Monday by President Reagan, is making a big push to strengthen and display his Western ties, even as he takes economic and military aid (but no troops) from Moscow. The most interesting aspect of the American argument over Mozambique, however, lies not so much in its terms as in the principal parties to it. The parties are not, as you might expect. Ronald Reagan and liberals to his left. The parties are Ronald

The fate of struggling, bereft Mozam- Reagan and conservatives to his right. As a country where an ostensibly anti-Commu-nist resistance is going on without Ameri-can backing, Mozambique has become a symbolic cause for hard-core conservatives. They demand that Mr. Reagan conduct there the rollback policy he is conducting elsewhere in places where Marxists came to power in the past decade.

To his credit, Mr. Reagan is reaisting these urgings. His more subtle and pragmatic po-licy sees Mozambique's Renamo guerrilas accurately as clients of unregenerate South Africans and Portuguese, recognizes the African nature of Mr. Chissano's leadership and welcomes the opportunity for the United States to perform a limited but useful service of diplomatic brokerage between South Africa and Mozambique. The issue comes soon to Capitol Hill in the form of an administration-backed effort to end last year's congressional ban on including Mozambique in an important regional transport project. Among Renamo's champions there are those like Senator Jesse Helms who appear immovable on the issue, and those like Senator Bob Dole who should know better. -THE WASHINGTON POST.

Diplomacy at a Discount

United States soon will be closing 15 overseas diplomatic posts, including two embassies, and laying off 1,300 employees from a State Department payroll of 22,000. Congress proposes to slash a crippling 23 percent, or \$767 million, from the department's budget. And this is being inflicted by the same lawmakers who piously bewail Wash-ington's declining global influence and risky dependence on foreign nationals.

These prospective cuts represent the mentality of a banana republic, not a great power. Diplomacy is the first line of defense and the front line of peace. The desire to reduce the federal deficit

makes sense. But the cuts are far from equitable and sensible. The same Congress that begrudges diplomacy approves by voice votes billions for pork-barrel programs. And it is not just a matter of pouring money into vote-getting domestic programs. Congress

Unless Congress decrees otherwise, the has disproportionately cut State Department operations overseas compared with overseas missions of other departments that employ 70 percent of U.S. personnel abroad.

The lawmakers are playing dice with the country's security: America's Foreign Service officers supply the bulk of political and economic intelligence. They often work under the worst and most dangerous conditions, as in Lebanon. Now they are asked to do more for less, and are blamed for failures to improve embassy security in Moscow which is a bit much coming from legislators who for years showed so little interest in repeated appeals for needed security funds.

No homeowner would sensibly economize by canceling fire insurance. That is what Congress proposes to do —unless the Senate rises above the House's banana republic reflexes and reinstates money denied a federal department as vital as it is vulnerable.

- THE NEW YORK TIMES.

Free Trade Has Its Risks

Prime Minister Brian Mulroney wanted a free-trade agreement badly enough to take risks. They were right to do it, for this agreement can bring important benefits to both countries. But the risks are not minor. The two governments now have to enact legislation to bring the agreement into effect, and each commander will have to deal with heavy sniper fire from entrenched protectionists.

This free-trade zone was conceived by both governments to set the world an example of enlightened commercial relations. Some experts objected that it pointed toward bilateral deals rather than worldwide rules. The answer was that the system of worldwide rules — the General Agreement on Tariffs and Trade - was becoming creaky and obsolescent. The Canadian-American agreement can set a standard for the GATT.

As the talks went on, they inevitably got entangled with shoes and ships and sealing wax - all the grievances over specific com-

At the last moment, President Reagan and modifies that are the substance of trade policy. But the most difficult of the differences seems to have been resolved ingenious-ly. Canadians do a lot of subsidizing, but much of it is irrelevant to exports. They feared U.S. companies would use exaggerated complaints about these subsidies to tie up Canadian exports in litigation. The solution is to be an international tribunal. It will abide by each country's law but guarantee abide by each country's law but guarantee that the law is fairly applied. If U.S. companies are right in saying they only want orderly enforcement of rules against unfair subsidies, they have nothing to lose. If Canadians are right in saying that the United States has indulged in stretched, tendentious readings of the law, this tribunal will correct it.

Next comes a fierce attack on the agreement by all the industries in both countries that find the idea of expanded competition to be deeply threatening. They are entitled to a hearing. But they don't deserve to win. -THE WASHINGTON POST.

OPINION

A Troubled Maghreb Looks Past Bourguiba

By John K. Cooley

LONDON — When President Ha-bib Bourguiba drank a glass of orange juice at high moon in the holy city of Kairouan one day some 25 years ago, it was one of those simple acts that can change history.

Several more recent acts may have postponed a revolution. On Sept. 27, a Tunis court spared the life of a Moslem fundamentalist leader, Rachid Ghannouchi, but sent him to prison for life. President Bourguiba, warned of the fundamentalists' growing boldness, reshufiled his cabinet, appointing as prime minister a professional soldier with a reputation as a tough security chief, the minister of state for

the interior, Zine al-Abidine Ben Ali. Islamic Jihad, the pro-Iranian group in Beirut, has threatened to murder Tunisian leaders if the death sentences against seven of the 90 fundamentalists tried last month are carried out (five of the seven were sen-tenced in absentia). But for the moment, Mr. Ghannouchi, one of

The real struggle in North Africa today is economic, not religious; it is about survival.

Mr. Bourguiba's most formidable op-ponents, has not been made a martyr. Still, the United States and Western Europe soon will have to face the consequences of Islamic resurgence throughout the Maghreb, or Arab West, as the Arabs call North Africa. In a way, it all began with Mr. Bourguiba's defiant consumption of the lates of consequences.

that glass of orange juice long ago. It happened in the fasting month of Ramadan. Believers are supposed to take no food or drink in the daytime unless ill or traveling.

Mr. Bourguiba drank the juice in view of television cameras and thousands of religious notables and ordinary Tunisians. It set the tone for the secular reforms he brought his country in the years to come.

try in the years to come.

Mr. Bourguiba was belligerently playing his role that day not only as a benevolent dictator but as a teacher of his people. He was demonstrating that fasting could be harmful to health and productivity at work. He went a step further and ordered cafes and restaurants to keep normal

and restaurants to keep normal hours, even during Ramadan.

This was a small but crucial part of the long campaign by the "Supreme Combatant," as Mr. Bourguiba enjoys being called, to separate religion and state in Tunisia.

Monogamous marriage, divorce and voting rights for women, encouragement of Western dress, equal educational and professional opportunities, all were part of the secularizing process that Mr. Bourguiba began soon after wresting independence from France in 1956.

I interviewed him in 1965, after his

I interviewed him in 1965, after his return from a Mideast trip. He drew public scorn but private approval from Arab leaders like President Nasser of Egypt by urging peace talks with Israel based on United Nations resolutions for Palestine. "Tunisia has to become a modern state," he told me. "We have taken the best from our foreign invaders, from the Phoenicians to the French. We are an Islamic country, and we're good Mos-lems. That doesn't mean that we are

nel Moammar Gadhafi in Libya, if the economic disaster brought by lower oil prices and the colonel's doctrinaire

mismanagement grows worse.

The problem is that the population has been rising in North Africa far faster than the number of jobs. The struggle today is for survival striggie totay is for autival.

In Tunisia, the United States assumed the main burden of economic aid after the French left. In the early 1960s, U.S. aid officials would point

proudly to Tunisia, then the highest per capita recipient of American assistance in Africa, as a model of how such help could spur development. But economic aid has dwindled, or been converted to military aid. Throughout North Africa, economic growth has almost ceased. Exports like Tunisian olive oil, Algerian citrus and Moroccan sardines com-

pete with those of Mediterranean Eu-

pete with those of Mediterranean Europe. Water resources and farmland are so badly mismanaged that the desert each year overtakes more land where food should be growing.

By the late 1990s, the Magineb is likely to be an international basket case, in Heary Kissinger's phrase. The United States is unlikely to do much about it. The problem will be dumped back in the laps of the former colonial

By David S. Broder

Judge-Bashing Is a Hazardous Game

WASHINGTON — The vic-tory that liberals now boast they will achieve in blocking Judge Robert Bork's elevation to the Supreme Court could be an expensive one. The game of judge-bashing which they learned from their opponents on the right, ultimately profits no one. It inevitably damages and could destroy one of the major safeguards of U.S. freedom:

the independence of the judiciary.

If Judge Bork goes down, as seems likely, he would be the second prominent and principled ju-rist in a year's time to be victimized by a campaign of mass propaganda.
The first was Rose Elizabeth Bird,
the chief justice of the California
Supreme Court. She was removed from the bench in November 1986 in a confirmation election that also terminated the tenure of two other

"liberal" justices.

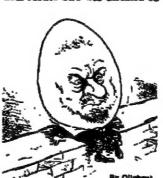

The parallels make activists of the left and right squirm, but they are unmistakable. The Senate confirmation process, like the California confirmation election, has been around for a long time. But neither has been used this way before. It is one thing for responsible senators to conclude, on their own reading of Judge Bork's record, that he does not belong on the Supreme Court, or for reputable legal scholars to oppose Justice Bird's continued service on the California Supreme Court, as some did. It is something else when judges are lynched to ap-pease the public.

Justice Bird lost because of the multimillion-dollar, mass media and direct mail campaign mounted by her opponents, and if Judge Bork goes down, it will be for the same reason. Once that gun is drawn, every judge and judicial ap-pointee can be held hostage to the popular passions of the moment Something precious and vital to American democracy will be gone.

There is irony in the fact that the battle against Justice Bird was orga-nized by the conservative support-ers of President Reagan, who is decrying the assault on Judge Bork. And liberals like Norman Lear. who were fervent in their defense of

Justice Bird, are uninhibited in their attacks on Judge Bork.

Both the left and right are ready to use all the tools of political communications against judges, as if deciding on a judgeship were a campaign for governor or senator or president. The radio and televior president. The radio and televi-sion spots and the computer-gener-ated letters employ the same sys-tematic exaggeration and repeti-tion. Justice Bird was defeated on

Robert H. Dumpty

the false allegation that she was "soft on crime," because she had voted "wrong" on case after case applying the death penalty. Judge Bork is succumbing to the false charge that he is "insensitive to personal rights." because he has been "wrong" on cases of importance to women and minorities.

With both political processes

With both political opponents overlooked the judges claims that they were applying the law as it came to them. In both cases, the oppo-

such moments, the majority will how that the offending person's or group's property be sezzed or their liberties suspended.

It is precisely at such moments —
when economic or political freedom

nents ignored the fact that if the judges truly were extremists, as charged, their views could not easily prevail among their presumably mainstream colleagues on the bench. In both cases, the opponents were embodiened by the fact that

the elected executives who appoint-

ed the judges no longer enjoyed great public confidence and the

is threatened by an overwhelming and angry majority, when a president wants to seize the steel industry or conduct mass arrests of demonstrators - that the independence and integrity of the judiciary is America's most precious resource.

Candidates for elective office now

routinely face battering by public emotions created, through the mass media, by opinion manipulators. To subject judges and judicial appointees to the same propaganda torture tests, whether from the right or the left, does terible damage to the underlying values of American democracy and the safeguards of forestern nacy and the safeguards of freedom.

No one wins in such games. The Washington Post.

At Last, for Steinem's Ms. Money to Go With Respect

By A.M. Rosenthal

The preview issue of Ms. magazine mass supposed to come out sometime in the preview issue of Ms. magazine mass supposed to come out sometime in the ment of the intellectual inspiration for modern American feminism, has been rewarded by hostility and iciness from much of the women's movement. She and Ms.

was supposed to come out sometime in the winter, but the editors were not sure exactly when it would be ready. So to be safe they put SPRING on the cover. It came out in January, right on time.
That was in 1972 Since then Ms. has been printing on time every month, great-

ON MY MIND

ly delighting most of its readers, greatly initiating its critics, influencing bigger and richer women smagazines, becoming a symbol and megaphone for one of the most successful and pervasive social cru-

most successful and pervasive social cru-sades of the century, the women's move-ment. And not miking a dime.
Gloria Steinera, one of its founders, usually took no falary, and the rest of the staff accepted wages that would have meant picket lines elsewhere. The demographics were good (this is pub-lishing jargon for well-educated read-ers with money to snare). Advertisers ers with money to spare). Advertisers said they respected the magazine; they just did not advertise in it much. So Ms. Steinam and her colleagues had

to look for somebody to buy Ms., at no profit to the creators, and guarantee enough backing to keep it going for some years. John Finfax Ltd., Australia's second-largest media group, came along with what M. Steinem was looking for:

real feminists with real money."
Two Australians — Sandra Yates as publisher and Anne Summer as editor -will take over from Ms. Steinem and Patricia Carbine, the co-founder, if the deal becomes final. Then Ms. Steinern can stop running herself rag-ged raising money for Ms. But before she settles down to just writing for the magazine, she is working to convince readers, advertisers and staff that Ms. will be the same, only a little rich.

For Wives, It's Different

LIZABETH DOLE resigned to help her husband campaign, though he will keep his Senate seat. "It's somehow different for wives," the transportation secretary said. By resigning she reinforced the inequity. She assures us there was no suppliant pillow talk. Instead, the unchanged conventions of society directed her to abandon her professional au-tonomy and give up a job she says she loves. The odds are Mrs. Dole won't get to the White House, She has provided a sad example for working wives.

—Jean Baker, a history professor and biographic of Mary Todd Lincoln, writing in the Los Angeles Times.

women's movement. She and Ms. Steinern have nothing to do with each

other. Feminism has as many rivalries and self-defeating feuds as any movement. It is not played with beanbags.

But Ms. Steinem became a kind of brand-label for the movement, instantly recognizable throughout much of the world. Much that is printed about her attributes her fame largely to her appearance. Nonsense; many women are attractive and chic, but they do not achieve international reputation. There

must be something more; there is.

I have known Ms. Steinern since my reporting days in India, where she was studying on a scholarship. Many of her political opinions, the people she admires and her romanticism about the Third World normally would give me hives.

But she is wonderfully good to talk and argue with. There is an intensity and sharpness of mind, but also a civility of discourse, an ability to explain and teach, that come across in a living and teach, that come across in a living room or a lecture hall. That ability to differ strongly without assuming enmi-ty have made her valuable for the movement, outside as well as within. She reminds me, in those traits, of Wiltiam F. Buckley, a thought that I trust will test the equanimity of both. Like other feminist leaders, Ms. Steinem thinks more about what re-

mains to be done than what the move-ment has accomplished. She says the day will come when women's organizations are not needed - in about the same time as men have banded togeth-

er, 10,000 years more or less.

But even short of that day, the movement has accomplished enough so that young woman, its chief beneficiaries, take what it has won for granted.

One of the gains is the ground won by Ms. Friedan's teachings that the road a woman chooses is right as long as the is free to choose it herself.

as she is free to choose it herself. One important current case: There are feminists who criticize Elizabeth Dole for campaigning for her husband instead of staying in the cabinet. But it was her choice, and she is campaigning as a politician for a politician. She may do at least as much for the political power of women in the United States as

for the senator from Kansas.

Ms. Steinem might debate that. But
there is no debate that she and Ms. are part of feminist accomplishment. The reason that people can laugh when she tells the story about the man in the restaurant is that women like Ms. Steinem have made it seem so long ago.

The New York Times.

THERE, THERE - DON'T TAKE IT SO HARD THAT PAT WON'T BE RONNING THIS TIME.

LETTERS TO THE EDITOR

In the Light of History, Bork Casts a Revisionist Shadow

Celebrating the anniversary of a doc-ument, even if it is the "sacred text" of political not only because it finds its the most wonderful form of self-govern-ment yet invented, is odd. If I had been home I would not have traveled to Philadelphia for the parades and oratory. Such activities do not summon the appropriate sense of reverence or grati-tude. By good fortune, however, I was invited, beginning on Sept. 17, to attend a three-day colloquium on "The Theory and Practice of Constitutional Government" in the Palais de Luxembourg, the splendid Paris quarters of the French Senate. The hall echoed with the thoughts of great men of the Enlightenment, as American and French scholars engaged in theoretical discussions that transported this listener back in time.

One nagging thought, however, pulled me toward the present. I could not forget, as I sat listening to the strains of constitutional history, that the Judiciary Committee of the U.S. Senate was listening to a different voice on the subject

of the intentions of the framers and the meaning of the U.S. Constitution — the woice of Judge Robert Bork.

There was little in Judge Bork's view that reflected the importance of the judiciary's role in maintaining the division of powers which Madison, and Montespeed quieu before him; deemed so crucial. Nor did he seem to recognize that the Nor did he seem to recognize that the liberty of individuals, the security of which Jefferson and later the framers considered the primary purpose of government, could not be guaranteed by any set of words alone but required institutional and procedural protections. Nor did he seem to appreciate the perceptivity of another French observer, de Tocqueville, who noted that the unique contribution of the American Constitution was that those institutional and procedural norms were to be established and preserved by an independent

power in the supreme political docu-ment but more fundamentally because its original and enduring role is to pre-serve individual freedom even against

the will of democratic majorities.

In our time this has meant that the U.S. Supreme Court has opened the way for racial integration in schools and workplaces; has helped to enfranchise workplaces; has helped to enfranchise large segments of the citizenry previously excluded by malapportioned districts, property requirements or literacy tests; has made it possible to reduce discrimination in public accommodation, the workplace and housing; has resisted the tendency of religion to intrude into government's secular functions; has experienced attended to the discrimination of th posed and eliminated some of the diverse forms of sex discrimination in American society; and, to a degree, has shielded individual autonomy against the imposition of the moral judgments

of politically powerful groups.

Each of these developments has occurred through the traditional judiciary process of elaboration of the text and case law of the Constitution. Most of these developments have been embraced by society and incorporated in state and national legislation; none has been rejected by lasting majorities. Yet every one of these advances, at one time or another, her bear approach the India Book.

has been opposed by Judge Bork.

When one is privileged to reflect upon the Constitution in the light that history sheds, a light that reveals not just words but the enlightened constitution in the light that reveals not just words but the enlightened constitution of its outlook. cepts of its authors, French and American, then one realizes that Judge Bork is a constitutional revisionist.

There is every appearance that the Senate, in the exercise of its constitutional role, realizes this and will say "no" to his nomination. If it does it will

third century of constitutional rule the true voice of history still speaks to us. ARTHUR L. BERNEY.

The writer is a professor of constitu-tional law at Boston College.

Regarding the opinion column "Free Speech: It's Bork Vs. Tradition" (Sept. 4): Anthony Lewis asserts indignantly that Judge Bork "wants to tear up set-tled understandings of the U.S. Consti-tution, root and branch."

Mr. Lewis had quite a different atti-tude in the Alan Bakke case in the 70s in which Mr. Bakke, a white man, in which Mr. Bakke, a white man, claimed "reverse discrimination" after being denied admission to a California medical school; the Supreme Court ruled he must be admitted]. Then, he was against "legal absolutes." I quote from his column of Sept. 22, 1977: "In an often lawless world, it is good that Americans thirst for principle. But we put too much on even our remarkable indicial institutions if we ask them to reduce shifting and indefinable social problems to legal absolutes."

Solna, Sweden.

The question about whether there is "a right to privacy" established by the U.S. Constitution should be turned on its head. The point is whether the Constitution takes away from the individ-ual his or her right to privacy, which is a natural one, and gives a right to intrude upon it to some other party.

ELIZABETH YOUNG.

Regarding the opinion column "And in the Opposite Corner, A Senator Out of His Depth" (Sept. 22):

Judge Bork is not being "bespattered with charges of racism, sexism, hypoc-risy and dishonesty"; these charges are

borne out by his statements and judicial record. William Safire has confused "conservative" with "reactionary." KEITH ERVIN.

ward Vaughn is among the few. He has

been an executive assistant to Coleman

Young, the mayor of Detroit, since 1982. He is the door to Mr. Young's office, the hinges of which shake daily

MEANWHILE

because Mr. Vaughn's work includes

handling all constituent complaints, all

police complaints and appearing at all

public meetings with Mr. Young. When all the alls are added, he still has

room for another life — the bookman's. Since 1959, which in Detroit's measure-

ment of time means eight years before the

Judge Bork objects to the Supreme Court decision in Griswold vs. Connecticut on the ground that he can detect no guarantee of the right to pri-vacy in the U.S. Constitution. I would have thought that the use of contraceptives in the privacy of one's home was protected by the right to "liberty and the pursuit of happiness."

GRANT BROWN. Oxford, England.

The Reality of Race I can't get my mind off Anthony Lew-is's opinion column, "For the American Far Right, Black is Red" (Sept. 21). It should change some readers' views. Unfortunately, it will not. Disraeli said it all a long time ago: "The only truth is race. There is no other."

After years of watching Californians vote on various initiatives. I've reached the point where I believe that if a secret ballot were held on the issue "Should blacks be returned to slavery?" there would be a two-thirds "yes" vote! The Falwells and Helmses take advantage of this to get money and votes.

What can be done? I don't really know. Change will be long and painful. FRANK BRADLEY. Melbystrand, Sweden.

Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's sig-nature, name and full address. Let-ters should be brief and are subject to editing. We cannot be responsible for

DETROIT — Men of action who city riot that took 43 lives and destroyed are men of thought are rare. Ed- 1,300 buildings, Mr. Vaughn has owned 1,300 buildings. Mr. Vaughn has owned and run what is now considered the oldest bookstore in America to specialize in Afro-American history, an intellectual passion that he includes with regular journeys to West and East Africa.

From a Bookstore Window,

A View of Drugs and Guns

This afternoon he is in northwest De-troit on Elijah Muhammad Boulevard, explaining the lay of the land. "In the middle of this block." he says, "is the mosque where Malcolm X was once minister. That was in the early 1960s."

As he tells stories of local heroes from the singer Aretha Franklin, whose father was a minister, to the Reverend Martin Luther King Jr., who was a regu-lar visitor to Detroit's churches — he also remembers black writers like Jean Toomer, Claude McKay and T. Thomas Fortune. He has sold their books for nearly 30 years, becoming sold himself on the belief that passing on black culture to Detroit's young is as important as anything he does for the mayor.

Though large, Mr. Vaughn's contribu-tion is but a drop of water in the city's deep well of chaos. Motown is now Guntown. Schools are shooting-galleries. Fourteen teen-agers were shot and killed over the Labor Day weekend. Forty-three died in 1986, with 365 wounded. This

year the death rate has increased. "Drugs," says Mr. Vaughn, "are the major problem. If drugs were eliminat-ed, we wouldn't have much of a problem. It's not so much that the kids get hooked on drugs. They sell them."

"This is the first city in America that I know of," he adds, "where kids were

brought in to sell drugs."

Mr. Vaughn did not learn this by reading reports on the drug crisis. He saw it through the window of his store, begin-

ning in the mid-1970s.

As drug selling increased, book selling decreased. Some years, Mr. Vaughn, had sales of \$500,000. When the gross went below \$20,000, he entered politics. In 1979 and 1980, he served in the state legislature. Before that, he taught African history in Detroit universities.

Mr. Vaughn recalls that the mid-1970s was also the time when schools began to lose interest in the teaching of black history and culture in high schools and colleges. And, he says, political erosions were occurring: "the moving away by the federal consensus of present desirated.

were occurring: the informing away by the federal government of programs designed to help the black community."

In the early 70s, after the fires were put out in Detroit, Los Angeles and other cities, black pride was used as a social force. Edward Vaughn betieved in it and built a creall business around it. His store built a small business around it. His store was able to compete in the marketplace against every business but the drug business. When the handguns come out and are fired in the war over drug profits, not only teen-agers are being killed off. Books and ideas are dying, too.

MARTINI&ROSSI

BACK TO THE SOURCE

champs-Elysées in Pal. Rossi, who was

COUN

OUNTeregorio Rossi, who has tasted on of the 300 different beverages inufactured by Martini & Rossi, ant the morning reviewing a new Artini advertising campaign at the propany's offices on the

sorn in Torino 50 yearago and now lives between Italy, Ps and Spain, expressed concern about he need to maintain Martini's findly public image. He requested me modifications in the to-be-telesed presentation, discussed legal camifications with the corporate lawyers and then chatted about thrompany which his family

founded in the mid-19 century.

What do you think he word Martini means to people?

Whether they drink Artini or not, people usually have a positive reactio when they hear "Martini" because of our trendytublicity and highly visible sponsorship activities

Many people knownar Martini is a light, wine aperitif but few recepize it as the best-known product; of the Gerral Beverage Corporation (GBC): a multination company specializing in the production and dtribution of alcoholic and wine beverages.

Ard few consumerare aware that many other products — Porto Offy, St.-Raphaël, Noilly Prac, Wikiam Lawson's, Ognac Gaston de Lagrange and Vodka Eristoff -belong to a private parent company with over de billion dollars in annual

We are a global corem and Marrini's evocation of both the exotic and onvivial is an ideal corpoate symbol for a nitinational company with Italian roots.

Why haven't you ken General Beverage Corporation publ₽

A lot of bankers and rokers want us to go public and it is a fashionale and seemingly profitable operation these days. But we don't want to make this move because whave developed sufficiently not to need outside chital. And we do not want to be compromised for he time being by the constraints of having to hower to public shareholders. We prefer to be fast-foving, flexible, and indepen-

Are you planning more acquisitions or new market developments?

Our strategy is to uild or acquire international brands within the alpholic drinks sector. We want good same brands with a long-term future and our past acquisitions inicate the type of well-known communies we seekpo purchase. Once we have a parreular product ifour stable, we use our marketing commercial an distribution machine to best position and sell it. We currently lack a champagne and may make fugher acquisitions in the wine

The products wehave acquired are still increasing market penetraton and we would like to make ill these brands as popular as Martini. This requires a well-orchetrated mix of marketing and the distribution of good, irreprozehable products. We are forming aspeiations to speed this process. For example, early this year we began using Bacardi Imports asour distributor in the U.S.

What is Martin & Rossi's principal challenge during the next five years?

We hope to maistain our steady progression of five percent annual growth in volume and ten percent in sales. We want to continue improving our dynamic and innovative management structure. And we must keep producing high-quality products facked by a vast promotional effort and an expansing distribution network. - Joel Stratte-McClure

BRINGING BEVERAGES TO THE WORLD

pire, is completely private and not likely to become asymbol on any stock exchange. fount Gregorio Rossi, a managing dector of the Group and member if the Rossi di Montelera family, descindant of the original founders of Mafini & Rossi, explains that the corperation does not require external finncing and its shareholders intend of keep GBC completely in their hads in order to maintain independence and flexibility.

Yer GBC has become a \$ billion company with 4,200 employed manufacturing and selling over 30 products through 80 subsidiaries aid affiliates in 25 countries. The Croup, a holding company, is run b GBM (General Beverage Management). whose managing directors at Count Gregorio Rossi and Marquis Sianluca Spinola, assisted by Maurizio Librario and Fernando Piqué. Analys agree that GBC's prowess in the ompetitive wine and spirit industry s largely due to the distribution nework it

Indeed, GBC companies Corporation, a hoding combine to form an international procompany whose thief duction and distribution system that asset is the Marthi & would be difficult to rival, Thirty-two Rossi beverage em- million cases, or some four hundred million bottles, of beverages manufacrured by Martini & Rossi are sold each year. And besides giving the group a solid strategic direction, GBC, through its specialized subsidiaries, provides overall marketing, technical, financial, administrative and data pro-

> All this is a long way from the origins in 1863. Then three partners - Alessandro Martini, Teofilo Sola and Luigi Rossi - rook control of an established 18th-century firm in Torino, Italy, which had been producing vermouth, a wine that incorporates aromatic substances and bitter plants.

cessing services.

The new owners moved the headquarters to Pessione, today only a thirty-minute drive from Torino, to be closer to the port of Genoa. They almost immediately extended their business throughout Europe and to

Brazil, Argentina, the United States and other countries.

The name Martini & Rossi dates is the most prominent brand name in the eyes of the general public, other companies under the GBC corporate umbrella include William Lawson's Scotch Whisky, Glen Deveron Single Malt Whisky, Cognac Gaston de Lagrange, Noilly Prat, St-Raphaël, Bosford Gin, Vodka Eristoff and Porto

"Our strategy is to diversify within the beverage and beverage distribution sector and to have a presence among an increasingly wide range of different alcoholic drinks," explains Rossi, noting that GBC has also taken financial participation in distribution and finance companies. "But there has been little incentive to delve into

unrelated fields." One of GBC's notable acquisition philosophies is to purchase and promote national bellwether drinks and

related products in different countries. In France, these products include Pastis Duval, Rum Duquesne, Cognac from 1879 when Teofilo Sola was Gaston de Lagrange, Calvados Boubought out. Though Martini & Rossi lard and Nutsy salted nurs. As a result of such diversification, competition

varies from market to market. The majority of GBC's business today is within Europe. France, which counts 20 GBC subsidiaries or affiliares, Italy, England and Spain are easily the largest markets. Beyond Europe the company is best known in South America where there are, for example, thirty different products sold in Uruguay.

Martini & Rossi products are often produced in varying strengths according to national legislation governing alcoholic content in different markets. But the Martini colors, logo and advertising campaign are the same worldwide.

We were one of the first companies to recognize the value of international advertising and we spend ten percent of our revenue annually keeping our products in the public eye." concluded Rossi, "People know that they can find Martini and other products in their home town."

— Joel Stratte-McClure

MYRIAD of exciting aromas including mint, caramel and some of the two hundred herbs and spices mixed and macerated to create the vast array of Martini & Rossi products - linger everywhere at the

company's 15-hectare facility near Torino. And Emilio Marocco, one of the firm's managers, instantly identifies every one of them as he strolls through buildings where a variety of beverages are manufactured, bottled, stored and shipped.

This area of northern Italy has been a production center of mixed wines, vermouth and liqueurs since the Renaissance, Today, four million cases of different beverages are produced here yearly by 300 employees, making this the largest of Martini's 23 production sites throughout the world. Fifty percent of the output is sold in Italy while the remainder is shipped to countries where there are no local production facilities, like the United States and Canada.

The facade at Martini & Rossi's traditional twostory Piedmont villa is decorated with the corporate name and the installation is like a small city, containing its own herb garden and a street named via Roma. Walking through the complex, with its surprising smells and intricate machinery, is a bit like being a kid at a chocolate factory. The calm of the sedate company town with a population of 500. is interrupted only infrequently by the Rome to Paris train.

A tour of the site ranges from the manufacturing and bottling of the world's most popular fruity sparkling wine, Asti Spumante, named after the nearby town of Asti, to the herbal room which contains the secret blend that makes Martini Martini. In a laboratory, rechnicians are checking the quality of Vodka Eristoff, China Martini and other Martini & Rossi products.

"Quality and control at every step of the production process are the key to Martini's success," Marocco explains, berting a visitor he can taste the freshness of aromatic Muscat grapes in a justopened bortle of Asti Spumante.

But the large wood and steel storage containers, high-tech bottling machines and quality control laboratory vividly contrast with a stunning subterranean Martini museum that attracts 30,000 visitors a year.

Located in the renovated brick-lined cellars, the 18-room museum opened in 1960 and initially included artifacts assembled by Lando Rossi di Montelera. Today its 500 Etruscan, Attic and Apulian objects, collected with the assistance of the Italian Department of Culture, trace winemaking from the seventh century B.C. to the present.

The oldest objects in the museum, which emits only a slight hint of must and aromatic herbs on rainy autumn days, are Apulian "olpi" used for pouring wine and decorated in early Geometric design on terra corta.

One room is devoted to wine presses, including those of Pliny and Caro which were in wide use until the first century. Another chamber features ornate and colorful agricultural carts employed to transport grapes during 18th-century festivals.

"The museum gives a touch of Dionysius to contemporary Martini & Rossi," explains Marocco, as he taps one of the old wooden casks and points out a bust of Bacchus.

After the tour, visitors are taken to an expansive room where barman Giuseppe Finello, once he ascertains that they are not spying for a rival, mixes his latest creation. On the wall are plaques showing prizes that Martini won decades ago in St. Louis, Budapest and Dublin. And behind the bartender are the wide range of drinks elaborated by Martini roday.

"The beauty of the latest exhibits in our museum," Marocco says, pointing to the wall of different beverages, "is that they have great value but can still be consumed."

- Joel Stratte-McClure

MARTINI&ROSSI

HE people who market Martini like to think the beverage could sell itself. But Martini & Rossi is universally renowned for the seductive and sophisticated advertisements for its products, on which it annually spends around \$60 million (just for Martini).

Martini & Rossi was one of the first companies to create international advertisements employed in different countries with modifications made only to the language of the text or script. The practice began over fifteen years ago and established the company in the vanguard of advertising.

"Martini sets the pace and has become a case study for pan-European and international advertising." explains Martin Mayhew, executive creative director for McCann-Erickson Advertising Limited, the agency which has handled the Martini & Rossi account for 17 years. "Together we market Martini by creating visual dialogues that everyone, in any market, can understand."

Martini accounts for 00 percent of Martini & Rossi's total business and currently dominates its product advertising campaigns. The best-selling Martini & Rossi product is still Martini Rosso, followed by Martini Bianco, Martini Extra Dry and Martini Rosé.

Each of the different products reflects an individual taste, market segment and promotional slant, Martini Extra Dry, aimed at the up-market male, is considered the most sophisticated and prestigious product. Martini Bianco is refreshing, light and targeted at a younger market which equally enjoys Martini Rose's floral, fruity fragrance and taste. Martini Rosso, the best-known brand, with an intense reddish brown hue, is simed at a broader market sector.

White, red or rosé, Martini is consumed straight, in cocktails or as a long drink depending on the consumer, country or mood.

The Martini word is spread primarily through film and television commercials. But the Martini message is clear in any media: You don't just buy the Martini bottle and its contents, but ambience, mood and atmosphere. Advertisements, employing an upbeat and memorable musical jingle, promote the idea that Martini is the right drink "Anytime, Anyplace, Anywhere."

"The challenge is to keep Martini as up-to-date as the consumers who drink it," says Mayhew, who notes that though the Martini musical score has remained the same, the tempo is continually changing. "This is why we made some of our latest productions somewhat similar to pop video clips."

Global advertisements give Martini & Rossi better control over its message and image while resulting in a more cost-effective production process. Analysts estimate it would cost three times as much to create the same amount of advertising on

THE MAKING AND SELLING OF MARTINI

INTERNATIONAL TIERALU TRIBUNE"

Martini & Rossi posters by such renown iliustrators as San Marco, Cappiello and Dudovich.

a nation-by-nation basis. At the same time, such advertising enables the company to quickly update its image as consumers' artitudes change.

"We believe in multinational advertising rhroughout the entire media spectrum," explains Dino Aiassa, Martini's 41-year-old international advertising and marketing director. "We have long felt a global advertising campaign was the best way to reach our marker because consumers in different societies have become more and more similar. Today we are also pioneers in employing new types of media, like satellite television." In addition, Martini & Rossi subsidiaries hire local advertising agencies to create national advertising campaigns.

Martini & Rossi billboard advertisements are also seen throughout the world and the company is now launching corporate communication campaigns in international media. "Advertising Martini in different environments is an especially challenging and indispensable facet of our marketing activity because it forces us to keep up with the fashion of the times," contends Aïassa, "It enables us to reassure our consumers that we move with them as their lifestyles evolve."

Just what is Martini? The five different types of

Martini are vermouth, or wines which employ aromatic herbal blends to obtain their distinctive taste. Vermouth was invented, according to legend, by Hippocrares over 2,000 years ago when he blended almonds, herbs and gray amber with wine to create "Hippocras,"

The base ingredient of Martini is a rather dry

white wine made from rapes of Sicilian, Roman and Apulian origin. small dose of distilled alcohol is added to incree the strength, and herbs and spices provide the stinctive raste.

"We select and buy it wine from cooperatives and have a long relationip with the gowers to maintain year-to-year esistency," explains Martini & Rossi's wine condrant Riccardo hiccardi. "Different castes are cained due to the grape varieties, herbal flavorits and sugar and acohol levels."

The herbal blend isoncocred from a scree formula known only to ve people. Martini iself includes 35 different heal components but some 200 herbs and spices - nging from anise, care. mom, cinnamon, clove ad corrander to roseman summer savory, thymeand tonka bean - 20 mixed, macerated or distled in Pessione and then sent to different producin sites throughout the world. The flavors and stracts in Martini are all natural and the entire roduction process takes from six weeks to three tonths.

Although the Martininixture has not changed much during the last hudred years, its advertisements will keep evolvin to enlarge the moment and place of consumptio

"We have a simple onl," concludes Aïassa, "We just want people to:el comfortable drinking Martini anytime, anyplac anywhere."

WILLIAM LAWSON'S: A MASTER SCOTCH BLENDER

FTER a hard day's work on the North Sea, it is more than likely that the locals in the little town of Bunff will be gathered in the Market Arms pub over a glass of whisky, spinning the yarns of their latest

fishing adventures In Scotland, whisky is an essential mainstay not only of the country's economy, but also of its social life. At the annual Robert

Burns dinner, a festive event ---during which Scots around the world celebrate the memory of their national poet, the only drink allowed on the table is whisky. For centuries, the Scots have associated the rigors and joys of their Celtic heritage with the consumption and production of their reputed bescrage

Today, Scorch whisky is a product so perfected by time that it is practically considered a national em-

blem. But if whiske owes a lot to the Scots, the Scors owe a lot to their whisky production. Thereare many different producers of Scotch whisky spread out throughout the Highlands and none is more typical than William Liwson's, whose origins go back to the industrial revolution of the ninercenth century.

William Lawson began his career in Dundee as a whisky merchant in 1849, but soon expanded to blending, a technique introduced by Andrew Usher in 1800, whereby grain and malt whiskies from different distilleries are mixed together. After World War II, this modest enterprise moved to Coatbridge, where it set up a successful bottling LICTORY

Associated with Martini and Rossi for the past twenty-five years, the company now also runs its own distillery, located in Banff, at the eastern tip of Scotland. The MacDuff distillery produces the malt whisks used in William Lawson's finest blend and the pure malt Glen Deveron exported around the world. "The Scorch whisky industry goes back hundreds of years and the one we produce is of very high quality," proudly explains Michael Roy, who has been distillery manager at MacDuff for nearly two decades and is considered the keybeater to the perennial traditions of his Scottish heritage.

Roy often makes the tours of his different customers wearing a kilt and has encouraged his younger son to play the bagpipes. From his home on the edge of a superb 18 hole golf course, he can

The international advertising campaign.

William Lawson's amateur golf tournament, which gathers several thousand participants from all over Europe. The ten finalists are subsequently invited to Scotland in order to dispute the William Liwson's Cup, a sporting event that has become almost as important as the product itself.

Indeed, tradition has remained totally preserved

in the production of Scotch whisky and consistent quality is vital, not only for making William Lawson's own whisky, but because other distillers use the whisky made at Mac-Duff, "We sell malt whis-

ky to most independent blenders and conversely we buy whisky from them to

see the salmon jumping in the nearby Spey river. use in our blend," adds Roy. The William "Another essental element in a good whisky is whisky is on the rise. Alongwith his peers of the And each year, he participates in the finale of the Lawson's blend is a combination of many different water and ours a conveniently provided by the Spey Valley, he is very optimistic about the latture malts as well as three or four grain whiskies, all carefully selected from various distilleries spread out along the famous "whisky trail" of the Spey

Valley in the Highlands. While the manufacturing process of the "malt whisky" produced at MacDuff's is similar to those in the other distilleries, it benefits from the vast knowledge of John Ramsey, Lawson's official distiller, passed down by generations of Highland distillers. Considered an exceptional "nose," Ramsey knows how to blend the different malts and to ensure their constant quality over the years. In the dark cellars stocked with oak casks, a certain evaporation takes place, which professionals refer to as having gone to the angels, "They're the thieves as far as we're concerned, but very imporrant in the manuration process," says Ramsey.

nearby Deveron Uver.

ns for Martini Bianco

nd Murthi Extra Dry

According to kw, whisky must be at least three years old before itean be sold on the market and it must be distilled a Scotland to be sold as "Scotch

All in all, more than seven million bottles bearing the Willam Lawson's label are sold peryear around the world, with the main markets being France, Italy, Holland, Belgium, Portugal and Spain. In the 12st, most of the tumover came from sales of traditional blend and the 12-year-oldwhisky, yet today ne pure and single malt, labeled "Glen Deveron," i on the rise. The objective is to develop international sales.

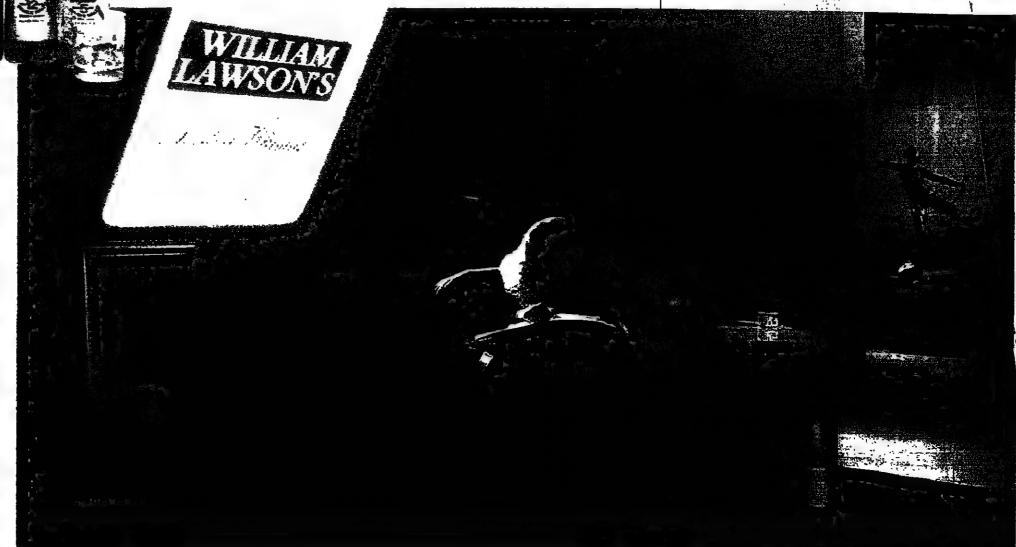

However, in recent years, Michael Roy has noticed a definite thange id consumer's caste and he firmly believes hat the demand for pure malt

of Scotch in general, especially since the market grows every year. In the ast two years, this commercial success has ben enhanced by the superb advertising campign conceived by McCann-Erickson and photographed by Jean Lajvière, featuring a sophisticated young couple si ping William Lawson's in viious select interne tional surroundings.

Says Mick Korvin, one of he creative directors handling the Martini products in France for McCann-Erickson: "One doesn't know if the setting is in Versailles or Soh because William Lawson's is both classic and modern. And it has a particular taste that is appreciated by a new generation of consumers toasting to the slogan: Light up your evening with a great Scoth."

OFFLEY'S PORTO WINES CELEBRATE 250th ANNIVERSARY

HE very first Portuguese wines were exported to England in the seventeenth century from the region of Douro in the northern part of Portugal. The artisanal beverages were soon known as "porto," alrhough the town bearing the same name is located quite a distance from the vineyards yielding the fruity nectar. These exceptional vineyards, called "quintas," are located on either side of the Douro River in an artist that has retained its original landscape.

area that has retained its original landscape with steep retraces that slope down from the top of the hills and fall into the river's embankment. They produce a unique species of dark grapes, as well as a white variety.

The rich earth and favorable micro-

climates have been essential to the success of Porto wines. To these natural factors, one must add the human element. Most of the harvest is still done by hand, as the terraces are too narrow to accommodate any machinery. The town of Porto also has strong ties with Villa

Nova de Gaia. This small township, located near the Douro River, is linked to Porto by three bridges. From there, the precious fluids are transported by boat from the far-reaching "quintas." It is in this town that one finds the famous cellars, where the Porto wines will age slowly, waiting to be bottled for worldwide exportation. For the past two hundred and fifty years, the Offley cellars have been firmly implanted in this town, producing a prestigious brand bearing its own label.

This outstanding Porto is brewed directly on the

"Quinta da Boa Vista." When the first English merchants set up shop in the town of Potto

around 1750, one of the prominent figures was William Offley, who officially founded his wine company in 1737. While the Marquis de Pombal, prime minister to King Joseph the First, established strict commercial regulations of Porto wine in 1756, it was a century later that a savvy Scotsman saved it from a deep crisis. Called upon by his uncle, who by then

had merged with the Offley company, Juseph James Forrester was able to detect an ominous epidemic that threatened to annihilate the precious vineyard. The Portuguese government was so grateful that he was betowed with the title of Barron Forrester which still appears on the company's lavels.

Today, the Ofley-Forrester company has maintained in ancestral traditions, enhanced with the most advanced technical equipment available. One of their oldest cellars in Vila Nova de Gaia is the "Aguias." There, in 'the dark quiescence,

the wine begins its perennial using process. Depending on its initial characteristics and the quality of each September harvest, the wines will be divided into the different categories of the big Porto family.

When a port wine has aged sufficiently — at least three years — and its blend is enemed suitable by the experts, it undergoes various treatments such as clarification, filtration and stabilization before being bottled and sent arount the world. But when a harvest is considered exceptional, then after two years of storage in barrels, he wine is declared "Vintage." Bottled pure, without any blending, it is then placed in big containers named "Garrafeiros" where it will age anywher from ten to thirry years or more. In honor of its 250th anniversary, Offley-Forrester, which also distributes Porto Diez on the French market, his introduced on the market an exceptional 30-year Porto wine that connoisseurs unanimously recognize as such, in keeping with the reputation of the Offley-Forrester label.

This recent success can only confirm joseph James Forrester's motto: "There is only one wine that can be called Porto and there is only one Porto that can be called Offley."

— Mary Deschamps

Martini & Rossi, an active partner in sporting events, won the 1987 world rally championship with Lancia (top) and has also participated in offshore powerboat racing (left) and stunt flying (right).

A PARTNER IN SPORTS

M

ARTINI & Rossi is not just a hit in the beverage sector. It has also created a vivid impression in areas as diverse as offshore speedboat racing, rally driving, acrobatic flying and fashion.

Last April, a television miniseries featuring a rally driver wearing the Martini & Rossi colors captivated viewers throughout Italy. Each day following the broadcast, switchboards at Martini & Rossi offices from Torino to Naples were swamped with callers asking where they could purchase the uniforms and sportswear worn by the actors. Even fashion-conscious Milanese wanted to identify with the daredevil and amorous Martini image portrayed on screen.

Three pilots flying planes featuring the same Martini colors perform as the Martini Acrobatic Patrol at air shows throughout Europe. The loops and twists of their planes constantly thrill observers. At a recent demonstration near Lausanne, one Swiss businessman observing their antics was wearing a polo shirt with a Martini & Rossi logo and a wristwatch sporting the Martini colors with a Lancia car as the second hand.

Last summer's Mediterranean Offshore Challenge sponsored by Martini & Rossi saw the Murtini colors race in exciting speedboat races in excite sites like Monaco and Sardinia.

Martini's logo was not quite as obvious in the offshore races, television series and air shows as the boats cars and planes. But it ran a close second and it was probably a rare spectaror who didn't register the Mirtini colors and trademark.

"We made a long-term commitment to participating it sports, particularly motor racing, and have tanghle evidence that this type of partnership is beneficia to the image, sale and promotion of our produce," explained Daniel Schildge, director of Martini & lossi's Racing Division. "But besides the promotional value, this activity involves an intimate relationship among Martini, the machines and the athlets. We want to be identified with the Challenge and,

sible, with

Spectators

sporting events

Gregorio Rossi but the company is not only interested in the challenge of sports. It has sponsored everything from orchestras to bel canto vocal concerts. It is also a corporate supporter of the visual arts and has sponsored exhibitions of the works of Picasso in Venice, De Chirico in New

York and Caravaggio in London.

"Martini & Rossi's support for the arts is but a reflection of our belief that art plays an important role in our lives," explained a company spokesman. "Sponsorship fosters sensitivity, understanding and creativity. In the case of the De Chirico exhibition, it also furthers the appreciation of an Italian whose work is so important to the history of the twentieth century."

Martini & Rossi's presence in the sports and arts sponsorship can be traced back to Teofilo Rossi who, with his brothers Cesare, Enrico and Ernesto, took over the management of the company in 1900. Teofilo was also mayor of Torino and company historians recall that he encouraged corporate interaction with both Italian and international communities.

The serious association with sports began in the 1930s with Theo Rossi breaking several world records in boar racing. Martini & Rossi associated with Porsche in the World Championship for Manufacturers; Brabham and Lotus in Formu-

> la 1; and Lancia in endurance and world rally championships. Fiat (via Lancia) and Martini & Rossi have worked together for eight years to enhance, through sporting events, the image and prestige of each

"We choose the sports that rend to fascinate the public over a long period of time," explained Schildge, noting the company has in the past sponsored world cup skiing, fencing, golf, sailing and polo. "And there are few activities that can beat the thrill and excitement of rally driving."

The partnerships have paid off. Martini & Rossi sponsored cars that have won the Le Mans 24 hour race three times with Porsche, picked up the endurance championship in 1982 and won the world rally championship in 1983 and 1987 with Lancia.

"Martini tends to sponsor sports within the world which consumes their products," commented Dino Aïassa. "Sponsorship is an ideal and prestigious way to attract new consumers to this light and refreshing drink while also reaching those who currently drink Martini."

But there is another payoff. Spectators want to look like the participants in Martini & Rossibacked events. Consequently the company has launched a Sportline range of fashion items which further promotes its name and products in the public eye.

— Joel Stratte-McClure

THE MARTINI FAMILY

The Martini & Rossi drinks on these pages represent only a small part of the group's total range of products. With the same care as that given to the more international brands, numerous beverages are elaborated and marketed by the group on a national or regional scale. These include:

CLASSIC APERITIFS: NOILLY PRAT AND SAINT RAPHAËL

of success during this before-dinner ritual, which takes place daily in clubs, bars and private homes around the world. Two of the better-known brands are Noilly Prat and Saint-Riphaël. Both are made according to a traditional formula, with a unique and secret blend of herbs and wines conveying distinctive aromas and flavors. Considered the classic French vermouth, Noilly Prat can be used either as a mixer, or, in keeping with the current trend of lighter, more natural favors, it can be savored on its own.

The home of Noilly Prat is the small town of Marseillan, on the Mediterranean coast, where Louis Noilly first set up his company to manufacture a dry vermouth based on a recipeinvented by his father. Soon after Claudius Prat went into partnership with him in 1893, Noilly Prat was being exported around the world and savared by connoisseurs of high quality beverages.

A view of the small port town of Marseillan, home of Noilly Prat. The elaboration of this unique product takes three years and uses a base of Picpoul and Clairette, two local white wines. After an initial period of maturation in dark cellars, the fortified wines are transferred outside into 600-liter oak casks for twelve months. This unique method of maturation conveys to Noilly Prat a very definite character change brought about by the vivifying Riviera climate, its sun, air, rains and frosts. Stepping out from the dark cellars, the glaring vision of thousands of barrels basking in the sun under clear skies

is a sight that has impressed many a visitor.

After its period of sur rorshipping, during which it obtains a rich amber color and a strong, full-bodied dry flavor, the budding vermouth spends another year in huge vars. Then a secret mixture of 20 herbs, along with various fruit extracts, is blended into the mixture, which rests for a few weeks to gather its full flavor before world exportation,

Noilly Prat vermouth has a number of cousins in the grear family of aperitif drinks, amongst which the celebrated Saint-Raphaël aperitif ranks highest.

"There is a definite taste for aromatic wines," says Arturo Palmero, chairman of the Paris based

St.-Raphaël company, affiliated with Martini and Rossi since 1960.

The origins of Saint-Raphaël go back to 1830, when Adhémar Juppet, weakened by his efforts to create a fortifying wine mixed with quinina, began losing his eyesight. Remembering the Biblical episode, when Archangel Raphaël healed Toby from blindness, he named his recipe Saint-Raphaël after his eyesight was saved.

.Until 1957, Sr.-Raphaël's unique product was its widely appreciated aperitif quinina wine, but the company now comprises a wide range of other products.

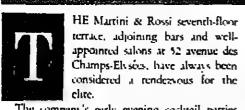

Today, 8 million bottles of St.-Raphaël aperitif are sold each year, while the total sales of the company's diversified products such as sweetened wines, sparkling wines, liqueurs, cognac, whisky and port account for 50 million bottles.

As for Noilly Prat, it is estimated that at least one bottle of its dry vermouth can be found in most liquor cabinets around the world and even though the three-martini lunch is less common these days, one can be sure that Noilly Prat will remain a definite "must" at cocktail hour.

MARTINI&ROSSI INTERNATIONAL

HIGH TECH ON THE TERRACE

The company's early evening cocktail parties traditionally focused on newsworthy themes and have often arrracted up to 700 guests and leading personalities from the stage, cimema, arts, business, scientific and arhleric fields. Every July, Martini's best friends are invited to watch the Tour de France coast to a finish while one past promotional party featured dancers from the Crazy Horse Salison playing golf on a temporary putting green.

"Being it the heart of the Champs-Elysees and on the top of Paris, we try to keep our friends in tune with times," explained Martini & Rossi's François Babou, who has hosted foreign delegations to the French capital, held fashion shows, featured are exhibits and celebrated birthdays and anniversaries at the retrace. "Nobody could resist this glamour even if they didn't meet astronauts, film stars and other celebrities while suspended above the most beautiful city in the world,"

The terrace provides a panoramic view that looks onto monuments including the Eiffel Tower. Arc de Triomphe, Louvre, Sacré Coeur and Montparnasse Tower. But this autumn, even the view has been changed and drinking Martini & Rossi beverages above the hustle and bustle of the Champs-Elysees has become a totally new experi-

The company has just completed a major renovation and reopened the terrace as an audiovisual and communication center which Martini hopes will fill a gap in Paris cultural and social life. Using considered a rendervous for the . a combination of satellites, television and other state-of-the-art high-tech equipment, a luxurious 50-sear theater is being billed as an "espace image" ... a space for images.

Aerial view of the Martini Terrace on the Champs-Elysées. Among the many celebrities that Martini has rescomed are tenor Luciano

In addition, picture windows have been added to provide a new look on the city and the interior has been completely redecorated. Where and spring decor will even be alternated to keep frequent visitors thinking they are in a lifterent environment. The company plans to hot smaller, intimate gatherings that will underline Martini's reputation as a meeting point for a drinklamong friends.
"We want to create intimate events in fashion

and other areas that will excite exclusive guests because they surpass the audiovisual experience anywhere else in the world," explained Martini & Rossi's Dino Alassa, who publishes the "Champs-Elysées News" to record all the comings and goings. "We want the terrace to become as talked about as Martini itself by offering people much more than a good drink."

While Paris is now the most high tech, it is not the only city to feature a rendezvous point for Martini lovers, mixers, movers and shakers.

The idea of a club or terrace in each city originated with the Rossi family. After the first appeared in Paris forty years ago, other clubs were launched in London, Genoa, Rome, Brussels, Sao Paolo, Barcelona, Milan and other cities. Each club has its own head barman who regularly invents his own drinks using Martini products and willingly relates the recipes to visitors.

The favored drink in Paris made by Jean Hierax, who has been barman on the terrace for 22 years and can mix hundreds of different cockrails using Martini beverages, is appropriately called La Dolce

"When people drink Martini in this type of environment they tend to want to take the atmosphere and drinks home with them," said the affable Hierax as he pointed out historical landmarks to a visitor. "I make sure they know what to do with our beverages by giving them stories behind each concoction."

GASTON DE LAGRANGE: ARISTOCRAT OF COGNACS

UR distinctive trademark is that we are one of the youngest of all the cognac brands and consequently we are extremely dedicated to the quality of our product," says Henri de Castellane, chairman of Gaston de

Stemming from one of France's oldest aristocratic families, Gaston de Lagrange brandy has long been an integral part of the Cognac region and today is considered one of the leaders in a highly competitive field.

According to de Castellane, the consumption of brandy in general has benefited from recent world recognition. "It's become a fashionable product." he says. Associated with Martini & Rossi since 1962, sales of Gaston de Lagrange have steadily

increased over the past few years. While competition is heavy among brandy producers around Cognuc, it is also a region and a product that are extremely well-protected. Located in France's Charente and Charente Maritime departements, the region of Cognac has been divided into seven areas, according to their soil and grape species. In order of importance they are: Grande Champagne, Petite Champagne, Borderies, Fins Bois, Bons Bois, Bois Ordinaires and Bois à Terroirs. The wines in all these regions are whites. Their low alcoholic strength and high acidity are two essential elements in the production of brandy. But it should be noted that to be entitled to the appellation d'origine contrôle. Cognac, a brandy muse abide by stringent conditions, regulated by law.

At the outset, only certain grape varieties are considered valid. Sweetening of the vinified wines is not allowed, nor is the use of the Archimedian screw for pressing. As for distillation, it must be performed in accordance with the Charentais methads and take place within the demarcared Cognacregion. The two-stage distillation takes place in simple, onion-shaped por stills that have remained unchanged over the years.

Once the brandy leaves the still, it is stored in cak casks that generally come from the Limousinregion. New casks are used during the first year of aging, then the brandy is transferred to old ones in order to avoid too much tannin enrichment.

Whether in casks or in bottle, Cognac brandy often carries the letters V.O.P., V.S.O.P., V.O. or X.O. Respectively, these letters stand for Very Old brandy importers, it is not surprising that these designations have retained their Anglo-Saxon origins. Each designation corresponds to a certain age: from the four and a half year old minimum for the V.S.O.P. to the fifty or more years for the X.O.

Although the Gaston de Lagrange firm was officially created 25 years ago, the company prides itself in having since acquired some of the best old stocks of brandy available on the market.

"In order to be really successful, we had to sell a first-class product and build our brand image on a quality that existed but was not well known," explains de Castellane, who enjoys the challenge of launching a new brand of cognac.

According to the company's soaring sales figures around the world, and especially in the United States, the quality of Gaston de Lagrange cognac has definitely met this challenge with success.

ASTI SPUMANTE: ITALIAN EFFERVESCENCE STI Spumance is delicious. As an

Englishman working in France whose commitment to French wines is almost total and who thinks that Champagne is the only real sparkling wine and that it must be ver dry indeed, this is almost an admission of defeaf In fact, it is nothing of the kind: much more an expression of delight that a wine that I haven't drunk a dozen glasses of in as many years should be so good to drink. Amongst other things, it is the perfect summer aperitif, and although by the time this article goes to press, too many weeks of supmer drinking will have slipped past. I feel that a portle of Asci in the depths of winter should do nore to remind one of blue skies than any amount travel brochures or imported strawberries.

Asti Spumante is a DOC (the Italian equivalent of the Appellation Contrôlee wines in France), and

as such is strictly controlled. Only 8,000 hectares of best-sited slopes across 52 villages in south Piedmont that are planted with the Moscato grape have the right to see their juice used for the sparkling wine. The average size of each holding is minute. under one hectare, and with the investment and technical refinement required, the farmers have no possibility of making the wine themselves. As in Champagne, the majority of the production is in the hands of a few big houses, amongst whom Martini & Rossi are the largest and are able to contract for the best grapes. The style of Asti Spumante was actually developed in the early 17th century, resulting in a fizzy or "foaming" wine whose main objective was to retain all the freshness and fragrance of the grape. The oenologists of the time had already realized that the aromas of the Moscato grape were linked to the high natural sugars of the juice, and it was necessary to find a way that would prevent total fermentation, and the destruction of both the delicate fruity aromas and the soft flavor. Like many other wines with a natural tendency to sparkle, the biggest change was the 18th-century development of the glass hottle and especially the cork, which sealed the wine properly and kept it effervescent.

The great technical difference between Asti Spurnante and Champagne is that the latter is fully fermented as a still wine, with sugar and yeasts being added at bottling to provoke a secondary fermentation in the bottle. This is known as "la methode champenoise" and in most cases the finished wine is too dry or "green" for the public's taste, and is rounded out by "dosage," the addition of a amount of sugar solution. Asti Spumante, on the other hand, goes through only one fermentation. It is stopped at a point to retain the natural sweetness, leaving it with only 7.5 degrees of alcohol as opposed to 12 degrees for Champagne. Part of its justified popularity - the United States and Italy are particularly fond of it - comes from being low in alcohol. Martini and Rossi's press department would have us believe that Asti Spumante is, although slightly sweet, actually lower in calorie content than a dry wine. Perhaps this is a good sales pitch to a dict-conscious age, but the main argument for Asti Spurnante, Italy's leading sparkling wine, is in the natural, fruity flavor and grapcy charm.

- Steven Spurrier Académie du Vin

VODKA ERISTOFF: EMBLAZONED WITH QUALITY

OME family histories are so intricate and romanesque that at the outset they seem almost implausible.

This is the case of the Eristoff lineage, whose origins go back to the early days of Antiquity and whose intricate destiny could very well have been retraced by one of the great Russian writers such as Gogol or Tolston

In 1956, Prince Nicolas Engroff, hen to a prestigious name, conceded his coat of arms to Martini & Rossi along with the ingredients to a vodka formula, which had been a family

secret for several generations. After Georgia was taken over by

the Russians in 1801, the Eristoff family was bestowed its heraldic coat of arms in recognition for its loyal help and brave support. Its illustrious bearings are the irrefutable distinction given to those Georgian Eristoffs, who served the cear within the cos-

Today, as one of the Soviet Union's 15 constituent republics. Georgia is still world famous for the beauty of its landscapes and the quality of its wines and spirits, whose names have the same connorations for Soviet citizens as Bordeaux or Burgundy have for

According to the available family archives, the existing vodka formula, based on the distillation of local tye,

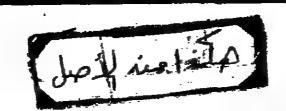

was concocted by Pance Constantin Eristoff in 1806. Hil son, Alexander, enlisted with the fibled cossacks of Kouban in 1892. Since one of the duties of the cossicks was to ensure the safety of the foar and his family, Alexander Erisplf proved himself several times and was rewarded with the highest howes. Having remained faithful to the coar during the first Russian revolution as well as during the cossacl revolt of 1905, Nicolas' further promoted as an officer in/the ranks of the "imperial guard." After the revolution of 1917, he emurated to Italy, where he lived berwen Milan and Recco as a prominenr figure of the local Russian com-

Faithful to the image of his glamorous ancestors, young Nicolas quickly adapted himself to the order of the day and abided by his ideals. Being a fervent anti-Communist, he took part in several ventures, notably the Italian Expedition Corps in Russia and fought in Crimea and in Stalingrad. Wounded, he returned to Italy in 1944, through Romania and Lassy where his father had served.

Granted Italian citizenship in 1958, he decided to pass along the vodka formula of his great-grandfather to Martini & Rossi. It is that golden crown which appears today on the Eristoff bottle, one of the leading vodkas in the world.

ITT Sells Its Stake In STC

Canada's NT Holds 27.8%

NEW YORK - ITT Corp., the Tuesday that it has sold its 24 percent interest in STC PLC of Britain to Northern Telecom Ltd. of Canada for about \$730 million, or an indicated \$5.57 a share.

Northern Telecom, meanwhile, said that it would sell 40 percent of its London-based Northern Tele-com PLC unit to STC for an unde-termined the price. The purchase would give NT 27.8 percent of

STC, the former Standard Tele-phones & Cable, makes telecom-munications and business commumications equipment. Once a wholly owned unit of ITT, it earned £103.1 million (\$168 million) in 1986 on revenues of £1.93 billion.

Northern Telecom is the secondlargest maker of telecommunica-tions equipment in North America. after American Telephone & Tele-graph, and the sixth-largest in the world. It is the world's largest sup-plier of fully digital telecommuni-cations systems.

ITT said it has agreed to repur-hase the shares at the option of NT if British government approval of the sale is not obtained before the end of November.

ITT has said in July that it was considering selling its STC shares. ITT's other big interest in telecommunications is its 37 percent in Alcatel NV, a venture with Com-pagnie Générale d'Electricité of France.

ITT owned 100 percent of STC from the mid-1920s to 1979. By 1985, that holding had been reduced to 131 million shares, and those shares have rosen dramatically in value over the past year, from under \$300 million the summer of 1986 to \$500 million in March and \$700 million in July.

Persistent takeover rumors boosted STC's share price to 305 pence on the London Stock Exchange from 288 on Monday.

Oslo, Feeling Oil Pinch, Drafts **Budget for '88**

OSLO—Norway's minority La- 2 Norway Banks bor government, pinched by lower oil prices, presented a 1988 draft budget to parliament Tuesday that, among other things, foresees higher spending, higher taxes and a 393 million kroner (\$58.4 million) defi-

The budget would raise state spending by 6.6 percent before in-flation, including a big jump in funds for research and development. But the budget still predicts a deficit before loan transactions, compared with a projected surplus of 2.5 billion kroner this year and a deficit of 5.5 billion in 1986.

Spending is set at 245.0 billion kroner, after 229.9 billion in 1987, with government revenues expected to rise to 244,6 billion kroner from 232.4 billion this year.

The government, which toppled a center-right coalition in May 1986 during a battle over budget revisions, pledged tight fiscal poli-cies for several years to balance the country's economy. It expects inflation to fall to around 5 percent next year from a predicted 7.8 per-cent this year, making the real 1988 budget about 1.6 percent higher than in 1987.

"We must start making more than we are spending," Finance Minister Gunnar Berge said.

Even so, strong opposition is ex-pected when the parliament de-bates the draft budget over the next two months, particularly among Conservatives who want to hold the line against spending. The government was forced to revise its draft 1987 budget after parliamen-tary opposition, and Prime Minis-ter Gro Harlem Brundtland narrowly survived being ousted.

Norway, Western Europe's second-biggest oil producer after Brit-ain, is still trying to cope with a 20 percent fall in state revenues caused by last year's collapse in world oil prices.

About 40 percent of Norway's export earnings come from sales of natural gas and from the 1 million barrels of oil it pumps daily from its North Sea fields. The govern-ment expects oil revenues, worth 24. See NORWAY, Page 15

Lower Rates 1 to 2 Points

OSLO - Two major Norwegian banks, Bergen Bank and Christiania Bank og Kreditkasse, said Tuesday that they were cutting interest rates on all loans by between 1 and 2 percentage points, effective immediately.

The cuts are to 13 and 14 percent from 14 and 15 percent. The cut followed the govern-ment's announcement that it was dropping supplementary reserve requirements.

The reserve requirement, under which commercial banks must keep funds on deposit with the central bank in a nonnterest-bearing account, will be dropped as part of the mi-nority Labor government's iraft 1988 budget.

Den Norske Creditbank, Norway's biggest bank, said it would not lower its rates, now round 14 percent.

changed in 1988 from this year's expected 5 billion.

The nation has sizable foreign trade and current account deficits as well as higher inflation than most of its trading partners. High industrial costs and private consumption have also made it diffi-

cult to compete internationally.

Gross national product, the total value of a nation's goods and services, is expected to grow by just 1 percent next year, after 1.5 percent growth this year, according to the draft budget

Norway's foreign trade deficit is expected to narrow to 25.9 billion kroner next year, after an expected 32.4 billion deficit this year.

The government plans to boost state-backed research and develop-

Oil Slides on Rumor

NEW YORK - Rumors that Saudi Arabia had decided to discount its prices sent stude oil markets tumbling Tuesday, analysts said.

The rumors said that Saudi Arabia would offer rebates on sales of its crude oil retroactive to Oct. I for buyers in Europe, the Far East and the United States. The speculation pushed

down West Texas intermediate, the benchmark
U.S. crude, by 40 cents a barrel to \$19.42.
Cash markets dropped along with futures,
and North Sea Brent crude broke through the

\$18.60 level as fears mounted that prices would continue to plunge if the rumors were substanti-ated, traders said. Robert Norberg, spokesman for Aramco, the consortium that oversees most of Saudi Ara-

bia's oil production, said that he had no instructions from the Saudi government to bill lifters at other than official prices. In response to an inquiry concerning rebates, he said: "We are billing customers at Saudi official prices. That is all I cam say."

The rumors said that while Saudi Arabia would bill companies at official prices, it would grant rebates at the end of the month. According to the rumors, the rebates would depend on the buyer's location -in Europe, on spot prices for Brent; in the Far East, on spot prices for Dubai; and in the United States, on prices for

Alaska North Slope. Oil industry sources in New York were divided over the rumor.

"We see nothing to it," said an official at a major oil company, speaking on condition of anonymity. "We have not been informed of any rebates or their application to this company." "It doesn't make sense for Saudi Arabia to do this right now," said a crude-oil trading manager at mother company. "They've already proved they can have a major impact on the market. To do it now would be against their long-term goal of \$18 crude oil. Moreover we

would have heard from our affiliate in Europe if

there was some truth in it."

Kerkorian Moving on Pan Am

By Agis Salpukas New York Times Service ampleted a study of Pan Ameriin World Airways that brings him oser to a possible takeover of the

purces familiar with the deal. Mr. Kerkorian said more than a conth ago that he was interested in rying a stake in Pan Am.

eleaguered carrier, according to

Rhône Net Rose 15.4% in Half

Special to the Herald Tribune PARIS - Rhone-Poulence SA, the state-owned chemical and pharmaceuticals group, said Tuesday that net earnings in the first half of 1987 rose 15.4 percent to 1.14 billion francs (\$186 million) from 988 million

a year earlier.
Sales in the period ended
June 30 rose 2.7 percent to
28.75 billion francs from 27.98 billion, it said.

The consolidated figures include the results of Union Carbide Corp.'s U.S. agricultural products business, which Rhône-Poulenc. France's biggest chemical company, acquired at the end of 1986. Those results were not broken out. In September, Rhône-Poulence bought Stauffer Chemical Corp.'s basic chemicals business for \$500 million, which is expected to increase Rhône-Poulenc's U.S. sales as a percentage of total sales to 11 percent from 3 percent.

Sources familiar with the six-NEW YORK — Kirk Kerkortives of Mr. Kerkorian were expectish-French financier, who also had
ed to begin talks this week with Pan
a team of experts look at the airline. ICM-UA Communications, has Am's unions, seeking a way to gain control of the airline.

. The talks with the unions will be crucial in determining if Mr. Kerkotian pursues a purchase, the

A spokesman for Pan Am said the company did not comment on takeover efforts.

available for comment. Pan Am's stock closed Monday at \$4.50, down 12.5 cents, in trad-

The stock was trading at about \$6 earlier this year when takeover speculation was at its height. But 12.2 percent stake in July and Donald J. Trump, the real estate developer who took control of Resorts, also sold a block, the takeover spec-

ulation subsided. The price of the

stock has sagged since then. The union coalition indicated earlier this year that it would be prepared to offer about \$180 million a year in concessions over three years. In return, it said it wanted to increase the 7 percent stake that workers now have in Pan Am. The coalition also wants to control the board and gain other

safeguards of employee interests. After months of trying to find a financial angel, however, it was unclear what the coalition's position would be in the upcoming talks. The coalition, known as the Joint Labor Council of Pan Am, represents about 20,000 of the airline's workers and is made up of four of

Sources familiar with the six-week study said that representa-with Sir James Goldsmith, the Brit-

A source close to that effort said it broke down when the team said the labor coalition would have to make much deeper wage cuts than \$180 million a year.

Although Pan Am has shown some recovery because of heavy traffic to Europe this summer. management considers its costs too high to ensure long-term survival. Neither the leaders of the union The company earned \$10.5 million coalition nor Mr. Kerkorian were in the second quarter, in contrast to a loss of \$152.4 million in the sec-

The airline said Monday that its ing on the New York Stock Ex- traffic was up 14.4 percent in September, compared with last year.

After many years of losses the carrier has had much better speculation was at its height. But results this year and may reach its after Resorts International sold its goal of showing a profit for the year, company officials have pre-

Even if Mr. Kerkonan and his staff work out an agreement with the labor coalition, a big hurdle remains: Pan Am's strongest union, the Transport Workers Union, which is not part of the labor group.

Pan Am's board was scheduled to have a regular meeting Tuesday, but was not expected to consider any Kerkorian or union proposals. The union coalition has put management in the unusual role of reacting to the coalition's drive to find a buyer.

Just as in the case of the takeover of Trans World Airlines by Carl C. Icahn, the switched roles at Pan American are an indication of how unions have been able to use their ability to give concessions as a way of playing a major role in any take-over of their airline.

Lotus to Unveil 'Intelligent' Software

By David Sanger New York Times Service

NEW YORK - Long Development Corp. will introduce within the next month an unusual program that incorporates sevcral artificial intelligence tech-niques. Company officials said it would let computer users analyze ideas and text much as spreadsheets allow them to analyze

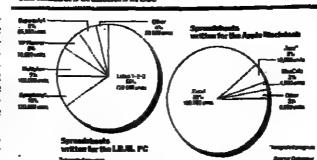

The program, called Agenda, has long been the source of speculation in the computer industry. It has been under development for several years by some of the software industry's best-known talents, including Mitchell D. Kapor, Lotus's founder, and S. Jerrold Kaplan, who left recently as Lotus's chief of technology. Separately, Lotus said Mon-

day that it would release two programs for Apple's Macintosh computer. "Modern Jazz," a sucessor to the company's failed "Jazz" program, is expected carly next year, and a version of Lotus 1-2-3 is expected in 1989. Loms 1-2-3 now runs only on

personal computers made by In-ternational Business Machines Corp. Lotus's chief rival, Microsoft Corp., has dominated the market for spreadsbeets that run on the Macintosh. Microsoft began direct com-etition on Tuesday with Lotus

for the loyalty of IBM PC dsheet users with the introduction of Excel, a spreadsheet for IBM's new generation of personal computers. The introduction comes at a

time of terrific growth for Microsoft: The company said Monday that its revenues for the quarter ended Sept. 30 would exceed \$100 million, compared with \$66

million in the corresponding 1986 quarter. The news sent its stock up \$6.50 a share, to \$79. in over-the-counter trading on

Agenda was designed by Kapor, Mr. Kaplan and Ed Belove, who heads the company's research and development. First details came in a speech to instiintional investors on Friday.

A copy of the speech, delivered by Jim P. Manzi, Lotus's chief executive, was released by the company on Monday. Mr. Manzi called the program "s flexible tool for manage ideas, people, plants and goals" that lets users "collect and categorize information on the fly."

Industry experts who have seen versions of the program describe it as an "electronic scratch pad" that uses some rudimentary artificial intelligence technique to correlate information.

The program divides data into latter might include telephone calls, visitors or "things to do." Say, for example, that a computabout a dinner he had attended.

histing his companions, the Mexican restaurant, the menu and topics discussed. The software might cross-reference all that data with information about 0ther dinners, other dining compan-ions, similar topics or Mexican

A few weeks later, Agenda would remind the computer user to make a follow-up phone call, jogging his memory about the topic discussed at the first dinner

■ Excel Unveiled

Microsoft, officially unveiling its long-awaited Excel spreadsheet program for IBM, said Tuesday that it is the first such software to fully exploit Intel Corp.'s powerful new computer chips, The Associated Press reported from New York.

William Gates, Microsoft's chairman, said that the new program would revolutionize the most important business uses of personal computers.

Excel will carry a \$495 list price and is to be shipped next month, Microsoft said.

Salvaged N.Y. Bowery Bank Is Bought for \$200 Million

By Eric N. Berg New York Times Sernes NEW YORK - The Bowery Savings Bank, one of New York's oldest savings banks, has been sold, two years after a group of investors helped rescue it from near collapse

with federal backing The buyer, the Los Angeles-based H.F. Ahmanson & Co., an owner of savings and loan institutions across the United States, will pay \$200 million in cash.

The price will produce a \$100 million profit for the investors who transformed the Bowery into a privately held company in 1985. The group included Richard Ravitch, the former head of New York's Metropolitan Transportation Authority; Laurence A. Tisch, chief executive of CBS Inc., and Warren Buffett, the financier.

Although the investors placed \$100 million of their own money at risk, they received nearly \$300 miltion in financial aid and guarantees against losses from the Federal Deposit Insurance Corp.

The Bowery traces its roots to 1834, when waves of immigrants began arriving and settling on New York's Lower East Side.

Beginning in the early 1980s, the Bowery fell onto hard times as interest earnings from its portfolio of old, low-paying, fixed-rate mort-gages were inadequate to finance

igh-rate deposits. Under Mr. Ravitch, the Bowery has climbed back to profitability; its net worth nearly doubled in the last two years, to nearly \$200 miltion. But according to Mr. Ravitch, the Bowery lacked adequate capital -as well as economies of scale and product diversification - to compete against stronger rivals. With the Bowery unable to grow and cut

costs as quickly as those rivals, its

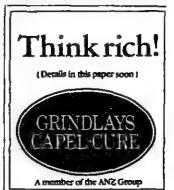

investors decided to sell out to Abmanson, an investor with even deeper pockets, Mr. Ravitch said. Ahmanson said it was attracted by the Bowery's firm position in New York's real estate market. Bowery has 25 New York City branches with \$6.7 billion in assets

and \$5.1 billion in deposits. On Wall Street, initial reaction to Ahmanson's move was basically favorable. The company, analysts noted, has built up more than \$27 billion in assets by avoiding many other businesses into which savings and loans have ventured and by focusing instead on one business: making one type of adjustable-rate loan to owners of single-family

In trading Tuesday on the New York Stock Exchange, Ahmanson stock closed at \$20.50, down 25

Citicorp Sets 2-for-1 Split

NEW YORK - Citicorp has declared a 2-for-1 stock split on outstanding common shares. The shares will be distributed Nov. 10 to holders of record Oct. 30.

Hooker of Australia to Buy Altman, Its 5th U.S. Chain

SYDNEY - Hooker Corp., an ustralian property and retail ampany, said Tuesday that it had meed to buy control of B. Aluman Co., its fifth U.S. retail acquisi-

on in the past 18 months. Hooker, run by George Herscu. property developer, said it would ry 58 percent of the closely held mpany for an undisclosed price, alle negotiating for the rest. B. itman, an up-market chain with department stores in New York tte, New Jersey and Pennsylva-a, has annual sales of about \$300

Hooker said it would purchase e stake from a group of investors to bought the stores in 1985 from e Altman Foundation, a charity tablished by the founder, Berrd Altman, before his death in 13. Under the 1985 agreement, e foundation retained its real es-

Hooker's spending spree began mid-1986, when it acquired 80 reent of the California-based erksamer Jewelers chain. But the ce increased in April, when it ew York-based Bonwit Teller dision for \$101 million.

Last week the Australian develser said it would acquire most of rancially beleasured Sakowitz c., a Houston retailer, under a organization planfiled in federal mkruptcy court.

Hooker would pay \$7.5 million

for 80 percent of a new holding company that would be 20 percent-owned by Robert T. Sakowitz, the chain's chairman and a member of

its founding family. Hooker also agreed in early Sep tember to join major shareholders of Parisian Inc., a specialty retailer based in Birmingham, Alabama, in

a \$252 million buyout. In addition, Hooker said it was developing four regional shopping mails in the United States, averaging 1.5 million square feet (139,000 square meters) each.

"Our interest in B. Altman is based on the extensive retailing ex-pertise and broad market recogni-tion of the chain," Mr. Herscu said

"Altman's upscale image will complement Hooker's other recent retail acquisitions in the U.S.," he

Altman's flagship New York City store, occupying the entire Nack between Madison and Fifth avenues on East 57th Street, is a well-known landmark.

The group selling Altman in-cludes Anthony Conti and Philip revivo, former partners in the accounting firm Deloitte, Has-kins & Sells.

Hooker's extensive U.S. operations include Hooker-Barnes Homes and Hooker Holdings, based in Atlanta. Last December, Hooker bought Merrill Lynch

Dollar Mostly Lower on Rate Worries

Compiled by Our Staff From Dispatche NEW YORK — The dollar osed slightly lower Tuesday painst most currencies in a market omnated by conceases.

New York the dollar creat up In New York, the dollar crept up, 146.70 Japanese yen from 146.55

a Monday.

But against the Deutsche mark, se dollar ended at 1.8330, down on Monday's close of 1.8395. Earlier in Frankfurt, the dollar

as fixed at 1.8341, down from 8444 on Monday. The drop followed news that the mdesbank, West Germany's cenal bank, raised a securities-related terest rate and that the move ald be a precursor to an increase the country's equivalent of the S. prime rate, according to Kathn Buckley, a trader with the

The dollar also closed in New ork at 1.5305 Swiss francs, down un 1,5330 on Monday, and at 1995 French francs, more than 2 ntimes down from 6.1225.

The dollar was also lower against British pound, which closed at .6335, against \$1.6285 on Mon-

Norway May Order Delay

In Oil and Gas Investment

OSLO — Norway said Tuesday that some of its proposed North Sea oil and gas development projects might have to be temporarily shelved to prevent investment from reaching excessive levels. In its 1988 draft budget released Tuesday, the minority Labor government predicted Norway's oil and gas output would hit 76 million metric tons (83.6 million short tons) oil equivalent in 1988, about 12 percent more than this year's forecast of 68 million metric

The government said total investment in Norway's offshore sector was likely to reach 33.5 billion kroner (\$4.98 billion) in 1987, but that new investment should not exceed 25 billion kroner a year if Oslo is to

In 1986, investments in Norway's petroleum sector totaled 25.

London Dollar Rates 1,8345 1,4325 1,4645 1,5300 4,1973 1,6235 1,6235 146,89 .1,5350 e,1344

New York currency market about at 146.95, above Monday's closing the direction of U.S. interest rates, of 146.80. It closed at 1.3300 Swiss following a warning to the Federal francs, down from 1.5350 on Mon-Reserve Board by Beryl W. Sprinday, and at 6.1073 French francs, kel, chairman of the President's more than 2.5 centimes down from

Council of Economic Advisors. money supply to the point of damaging the economy.

Despite Mr. Sprinkel's views,

many traders expect an increase in government money rates by Christmas, Ms. Buckley said. Earlier in Europe, the dollar sta-bilized during quiet afternoon trad-

ing in Europe, but still ended down on the day. Dealers said that rumors about

helped to curb earlier technical sales. But they said the market was essentially directionless ahead of

U.S. trade data for August due out next week. In London, the dollar closed at 1.8345 DM, down from 1.8402 at the opening and 1.8422 at Mon-

The dollar closed lower at 146.65 There was also speculation in the Japanese yen, after trading initially

6.1346 on Monday. Mr. Sprinkel, who has an-nounced his resignation with effect importantly as high interest rates from November, urged the Fed not and hopes of short-term gains atto restrict the growth of the U.S. tracted buyers, according to some

The pound closed in London at \$1.6325, against \$1.6235 on Mon-

day. Earlier, in Paris at 6.1050 French francs, down from 6.1360. The dollar closed in Zurich at 1.5305 Swiss francs, down from 1.5355.

Overnight in Tokyo, the dollar closed at 146.70 yen, down from 147.05. (UPI, Reuters)

domestic industry regain market shares lost at home and abroad.

The Labor government has attributed Norway's foreign trade deficit in part to industry's inability to keep pace with products offered

by its main trading partners.

But Mr. Berge still expects the current account balance of payments deficit to widen to 35 billion

kroner from a forecast 29 billion

Pöhl Says Rise In Rate Aims to Curb Inflation

FRANKFURT - The pres dent of the Bundesbank, Karl Otto Pöhl, said Tusday that the West German central bank wants to slow the rate of money growth to counter inflationary

Mr. Põhl was commenting on Tuesday's rise to 3.6 percent from 3.5 percent on the rate at which the Bundesbank offers funds to the domestic money market. He said the rise was not a monetary change of course.

"But in the current situation," he said, "we want to indi-cate that the Bundesbank, with this especially flexible instru-ment, wants to gradually subdue the pace of monetary expansion to the extent that nobody need expect a deterioration of the price climate in West Germany, including in the long term."

Mr. Pohl said a further rise in yields was undesirable.

Mrs. Brundtland suggested

Tuesday that her government

might be willing to compromise on

parts of its draft to avoid a fresh

"I think we've had enough gov-ernment crises and should now concentrate on the tasks ahead," she said, referring to a failed oppo-sition attempt to oust Labor this

political crisis.

ACURA: Japanese Auto Manufacturers Assaulting the U.S. Luxury Market

wanted something more plush. But the Japanese are certain also to end up gunning for the owners of American and European luxury curs like Mr. Carpenter, setting up what some experts think will be one of the most important marketing battles since the first Toyotas hit the United States in 1957.

The move into upscale cars by the Japanese is more of a threat to Detroit than the competition from Japan in the low end 10 years ago," said Christopher Cedergren, a senior analyst at the automobile research firm of J.D. Power & Asso-

It is at the high end of the market where profit margins are fattest for General Motors, Ford and Chrysler. And it is in that segment, analysts predict, that Detroit's cars will be the most vulnerable to competitors who have proved themselves to be aggressive and quality-conscious. Despite a downturn this year, it is also where sales are expocted to grow the fastest in the next decade. Luxury cars are roughly defined as those selling for \$20,000 and up. Even the Europeans, despite

flashier images and the cachet of names such as Jaguar, Audi, BMW and Mercedes-Benz, are expected to be vulnerable because they have historically captured many drivers NORWAY: Draft Budget Unweiled of Japanese cars who have upgraded to something classics.

"The domestics have much more the domestics have much more than the first finance page)

to lose at first," Mr. Cedergren said. "Later the BMWs and the Mercedeses will feel the pinch, Honda's early experience with

Honda's early experience with Acura suggests that both Detroit and the Europeans have plenty to worry about. Surveys of buyers of Acura's Legend coupe showed that about 41 percent had previously owned Japanese cars, 33 percent had owned domestic cars and 24 The government also plans to cut spring over 1987 budget revisions.

Mrs. Brundtland can count on egriculture and increase spending support from a 79-seat Labor-Some environmental protection.

The budget would increase inserting over 1987 budget revisions.

Mrs. Brundtland can count on else Purchasers of the coupe had a median family income of \$90,000, on environmental protection.

The budget would increase inserting from a representation of the coupe had a median family income of \$90,000, on environmental protection.

Davis Mingworth Jr. of Toyota, above, and William R. Bruce of Nissan.

The European automakers contend that they continue to set the standards in styling handling and technical advances such as anti-lock braking systems. But makes of luxury cars on both sides of the Atlantic say they have grown in-creasingly wary as they look to-ward the Pacific.

"We definitely see it as a threat,"

get tougher."

However promising the outlook for them, the Japanese companies

are well aware that they have a host of problems to overcome, not the least of which is creating an image ever heard of does not say much of to offer it to them."

development and marketing - in

William R. Bruce, the head of Nissan's new luxury division, Infiniti.

open to the idea of a Japanese luxury ry car. Acture expects to sell more than 55,000 of its Legends this year plus another 50,000 or more of its lower-priced Integra model, which is not considered. lower-priced Integra model, which is not considered a luxury car. By comparison, Cadillac will sell about 277,000 vehicles this year and Mercedes about 90,000 in the United States. Mr. Bruce thinks Nissan could eventually sell 200,000 Infiniti cars a year.

Executives at the three compa-nies say they are simply following the needs of the loyal customers who have been buying their lessexpensive cars for years — often baby boomers now starting to reach the peak of earning power. Many of those buyers have al-

ready moved up from their small first cars into more costly Japanese imports and now, in significant numbers, they are looking to take the next step into the \$20,000-andsaid Peter Gerosa, general sales the next step into the \$20,000 and-and service manager for the Cadil-lac division of General Motors, Cadillac as something for Chevro-long the leader in luxury-car sales. let drivers to aspire to and Ford has

BOOKS

A LIFE IN PEACE AND WAR

By Brian Urquhart. 390 pages. \$25. Harper & Row, Publishers Inc., 10 East 53d Street, New York, N. Y. 10022. Reviewed by Bernard D. Nossiter

P OR much of the past 10 years, reporters and diplomats seeking clues to some global crisis often went to the 38th floor of the United Nations headquarters in New York. They would march past the secretary general's office to the more modest quarters of Brian Urquhart, a tough, bright and funny Englishman who ran the UN's peacekeeping.

Urquhart has a diviner's knack for essentials. Inevitably, he succeeded his old boss, Ralph Bunche, to direct the UN's efforts at separating combatants with blue-helmeted troops. This is the heart of the United Nations. Its meager attempts to spur Third World development, its useful assistance for refugees (outside the Middle East), its sinister efforts to stifle the Western press and all the rest are sideshows. The UN was created to keep the peace. Unhappily, as Urquhart observes in this wise and witty memoir, the UN rests on a political fault. The organization, lacking sovereign power, depends on agreement between the Soviet Union and the United States, an accord

that rarely occurs. Urquhart, a scholarship boy at the elite Westminster school and a scholarship student at Christ Church, Oxford, was the second man recruited to the embryo UN in 1945. Until Urophart retired 40 years later, he spent his working life in the UN's secretariat and never lost faith in its potential for good.

In this characteristically reasonable, enter-taining and discreet memoir, Urquhart makes a convincing case that UN peacekeeping etforts have been more successful than not. Lightly armed international troops cannot and should not stop a Turkish invasion on Cyprus or an Israeli invasion in Lebanon. But the peacekeepers have frequently separated Greek and Turkish Cypriots, Indians and Pakistanis,

Israelis and Syrians, the PLO and Egyptians.

The dull conservatives now running the Anelo-American world offend Urquhart's sense of style as well as content. He contrasts Margaret Thatcher with her former foreign minister, Lord Carrington, whose "wisdom, common sense and humor provided an excellent foil for the new prime minister." The Reagan election in 1980 meant the UN had been reduced to a

THEBAKERSTREET

"troublesome sideshow" and also created a major emotional and ideological shift in its policy toward the Middle East. Its most project nent feature has been a mindless support feature has been a mindless support feature distance almost every Israeli adventure. Although the quhart does not say so, this uncritical view the United States to sell arms to Iran, a scheme pushed by the Israelis. That in turn inspired Washington's equally heedless entrance the Gulf War on the side of Iraq.

Plate

When the United States gets into Middle East bargaining. Urquhart observes. price of all the rugs tends to go up, and the prospect of a deal becomes more distant.

Bernard Nossiter reported from around we world for The Washington Post for 24 years and served as United Nations bureau chief for The New York Times. He wrote this review for The Washington Post.

aching an agreement.

The main sticking point has been e union's demand for unrestrict-

an undisclosed location. John Jones, a council spokes-in, confirmed that Upshaw will

"He's not a strikeout pitcher," Craig said. "He makes them hit the ball, and sometimes they hit the ball for base hits. But if I had one pitcher in the league to go out and start the playoffs, I think I'm like a lot of other managers - I'd go with Rick Reuschel."

on the bases is even more impor-tant with slugger Jack Clark (35 homers, 106 RBIs) still sidelined with a sprained right ankle. Catchers Bob Brenly and Bob Melvin have the primary responsi-bility of keeping the Cardinal "jack rabbits," as Brenly called them, from tearing up the basepaths. Vince Coleman's 109 stolen bases

dwarfs anyone else's major league total, and Ozzie Smith added 43. And Coleman and Smith love to pull off the double-steal.
"We've had good success this season in throwing out runners," Brenly said. "It's not just a catchca's responsibility. It's everyone's. The pitchers and our infielders

have to do their jobs, too."
Without Clark, the Cardinals
will have to eke out runs as they did in last week's pennant-clinching se-ries against Montreal. Clark pinchhit twice in the final weekend series against New York, but wasn't expected to play for another week. "Hopefully, something will hap-pen so I can play," Clark said after the Cardinals clinched, "and if not, maybe I'll be ready for the World

Series. I'm just taking it day to day." St. Louis Manager Whitey Hermes and 4 shutouts were second

OBSERVER

Campaign Molehills

By Russell Baker NEW YORK - When the press people failed to notice that Senator Joseph R. Biden Jr. was out in Iowa using Neil Kinnock's great campaign speech as his own, the campaign manager for Governor Michael Dukakis called it to their attention.

The senator and the governor were competing for the same title - president of the United States and Dukakis's campaign manager obviously wanted to put Biden at a

In this instance the results were extensive. The first was to make Kinnock, leader of the British Labor Party, a household name in the United States. When film of Kinnock delivering his great speech in England was juxtaposed with film of Biden delivering the same material in lows, the sensior was made to seem immature and foolish. After a few days of taking the heat, he dropped out of the competition.

Even before this, however, the story was beginning to drift off from reality. This was because of the way Dukakis's compaign manager had called the press's attention to the Kinnock aspect of the story. One way he could have done this

was by holding a nationally televised news conference. "I regret to point out." he might have said. that the American media have completely failed to notice one of the most interesting things happen-ing in this campaign," and shown the films of Kinnock and Biden both delivering Kinnock's speech.

The campaign manager, whose name is John Sasso, did not do it this way. Campaign managers hardly ever do. For one thing, they like to be known as "behind-thescenes operators." For another, the press is extremely thin-skinned and would probably not take it well if the campaign manager went on TV

to accuse it of missing a big story. Instead. Sasso did what campaign managers almost always do in such cases. He spoke privately to a handful of newspeople, gave them the film material and obtained the "source's" usual pledge that nebody would tell where the stuff came from. The beneficiary news organs were The New York Times, NBC News and The Des Moines Register.

As usual, reporters not favored

by the campaign manager had to produce follow-up stories. The follow-up was obvious to every reporter with two weeks' experience in the trade: find out who had called attention to Kinnock. There were three possibilities, and the first - that a British reporter had wandered into lowa - could be discarded immediately since the story would have surfaced first in England.

The second, and really tantalizing, possibility was that the hand of White House had been at work. Biden, after all, was chairman of the committee handling the Bork nomination to the Supreme Court. and he was against it. Maybe a madman amok in the White House thought that humiliating Biden would help Bork's chances.

In fact, had the White House been behind it, the Bork nomination would probably have been destroyed, which would have made a superb follow-up story.

The dull truth was quickly obvious, however. The deed had almost surely been done by one of Biden's rival cumpaigners. This was news of the dog-bites-man category. Still, ever since Gary Harr's cruise on the Monkey Business the Democratic campaign has shown a tendency to low comedy which encourages reporters to zealous evertions in hopes of coming up with more thigh-slappers. Inevitably, they unearthed Sasso.

If you read the political writers you might suppose that steering the press to a good story makes him a well-poisoner. Sensitive to headline hysteria. Dukakis, declaring him-self innocent of intent to damage the Biden campaign, sensibly hesi-tated a few hours before refuctantly firing Sasso for behaving like a campaign manager.

On TV afterward, the governor borrowed President Reagan's favorite technique for coping with catastrophe: He said that while he knew nothing of Sasso's behavior. as governor he would accept the responsibility for it. After accepting the responsibility, he accepted Sasso's resignation. The governor must henceforth be considered a very senous possibility for president. He knows how to do these things right.

New York Times Service

Toni Morrison and the Terror of Slavery

By Elizabeth Kastor

Woshington Post Service
WASHINGTON — For a
week Toni Morrison has
been away from her home in Grand-View-on-Hudson, New York, talking and answering questions and reading from her work. "124 was spiteful. Full of a baby's venom." she begins, her voice soft as a whisper, introducing the first two sentences of her new book, "Beloved" (published by Knopf in the United States. Chatto & Windus in Britain). The novel, Morrison's fifth, has received exuberant reviews.

At a Smithsonian signing, readers - most of them women hold the volume close to their chests like a treasured object. One fan tells her "Beloved" is so pow-erful she could not read it alone; the house had to be filled with people, a comment that reminds the author of her own trepida-

"I had forgotten that when I started the book, I was very frightened. It was an unwillingness and a terror of going into an area for which you have no preparation. It's a commitment of three or four years to living inside because you do try to enter that

And the life was a terrible one even to glance at, let alone invite into your mind and house. A Kentucky plantation of the 1850s where the master charts his slaves' "animal characteristics." Famtiles separated, runaways burned to death. Chain gangs, whippings, hangings, guilt, ghosts. And at the center of it all, infanticide: a mother who slits her daughter's throat and is about to kill her three other children, this to "save" them from the slavery she

has just managed to escape.

But the true story at the heart of the book, the story of Margaret Garner, who escaped to Cincinnati and succeeded in killing only one daughter before they stopped her, had stayed with Morrison for 10 years after she first read contemporary accounts of the woman's trial for murder. "I thought at first it couldn't be written, but I was annoyed and worried that such a story was inaccessible to art. If I couldn't do it. I felt really sold. In the end, I had to rely on the resilience and power of the

characters — if they could live it all of their lives, I could write it." Before Morrison began the story of the woman who soon ceased to be Margaret Garner and be-came Sethe ("I listen to the characters and ask what their names are. It's a process that is very respectful"), she had been preoccupied with "the ways in which women are able to love extremely well, nurture extremely well, and

the ways that sometimes also de-

stroys something.

"I was thinking about that in really very contemporary terms. And that led me to think about the ways in which we displace the individual self into the beloved. Sometimes it's children, sometimes it's husbands, sometimes it's careers or what have you. And we let the best part of us flourish in something other than ourselves and get completely erased."

Once Sethe has been released

from jail, thanks to the influence of some white abolitionists, and has placed a stone over her hter's grave carved with the word "Beloved." she settles with her three remaining children in the home of her mother-in-law on 124 Bluestone Road outside of Cincinnati. But 124 is spiteful; furniture flies and sad light plays across the floor and baby prints appear in cakes. Eighteen years after the act of maternal love and violence, Sethe and her family are still haunted by the 2year-old girl whose throat she slit. When Paul D., a former slave from the same Kentucky farm, appears and exorcises the baby ghost, another presence takes her place, a 20-year-old woman with a raspy voice and a scar on her throat. She can not explain where she comes from, and she calls her-

Sethe and her living daughter Denver know who this girl is. The black women of the town know, too. "I decided she would be two things," says Morrison. "For the characters in the book, she would indeed be the character returned. I decided for the reader she would be a real person, a real character with a life elsewhere. But their desires mesh. Her needs blend with theirs." Morrison was born Chloe Anthony Wofford in 1931

"If they could live it all of their lives, I could write it."

abama to Lorain, Ohio, and for sive, almost involuntary process. whom pain, storytelling and mag-ic were accepted elements of exis-tence. In "The Bluest Eye," "Sula," "Song of Solomon" and "Tar Baby," Morrison's youthful fascination with her (amily's tales remains. Butterflies and avocado trees express forceful opinions, a woman is born with no navel, a dead child returns, tales and lives are spon out in long fluid sentences that move through history and even past the grave.

"There are more parents who tell their children stories now." she says, "who read to them as a way of educating their children. We didn't hear stories that way. The adults weren't telling us stories, they were talking to each other. We overheard. They were to parents who had migrated from not patronizing us. Some people sharecropping in Georgia and AI- sometimes think listening is a pas-

Hearing may be, but listening isn't. The attention and intellectual activity and participation that you have when you listen to music -that's very complicated. That is what listening to good literature, or speeches or anything, is. You're really engaged. It's that quality of listening engagement I would like to return to the print

After graduating from Howard and receiving a master's degree from Cornell, she taught at Howard, and it was there she began to write. "I had nothing left but my imagination," she has said. "I had no will, no judgment, no perspec-tive, no power, no authority, no self - just this brutal sense of irony, melancholy, and a trembling respect for words. I wrote like someone with a dirty habit. Secretly - compulsively - sly-

Finally, she joined a writers group, and out of a story for the group grew "The Bluest Eye." a brief, searing novel about a young black girl's dream of having blue eyes, a story almost encyclopedic in its exploration of anger at whites and hatred of self among blacks in Lorain, Ohio.

In 1974 came "Sula," a novel about friendship between wom-en; once again Morrison was praised by critics and fellow black women writers, not only for her prose but for exploring worlds few others entered in fiction. The 1977 "Song of Solomon" won the National Book Critics Circle

"Beloved" began as the first part of a trio of tales that Morri-son believed would make up a book. "I thought it would be 75 or 80 pages long," she says of what became "Beloved." "When I turned it in to the editor, I said, Tin very sorry that I'm two years late, but I'm not going to be able to finish." The editor read the "unfinished" 275 pages and recognized it as a whole book, and now Morrison is working on the next story, set in Harlem in the 20s. When she admits to this, she rolls her eyes, exhaling something between a laugh and a sigh, for after "Tar Baby" in 1981 she thought she was done.

"I told myself, 'I'm going to free myself, and if I never write another book, it's all right,'"

After "The Bluest Eye." Morrison learned that books could be written only when she was ready. The process and act of writing is too important to do it because I have the time. I prefer to do it when I am unable to avoid it."

For years she had worked double, if not triple, time: editing at Random House until 1983, teaching and writing whenever she could find the quiet to do it. all the while raising two sons on her own after her divorce. She now holds the Albert Schweitzer chair at the State University of New York in Albany, nurturing several young writers through two-year fellowships that allow them "to put their writing at the middle of their lives," as she describes it.

Philippines and President Rafi AL forsin of Argentina are among of individuals and 31 organization, who are candidates for the 1937 Nobel Peace Prize. Jakob Sverdon the Norwegian Nobel Committees permanent secretary, said in Osla that the group neid its final meeting Monday to decide the recipient, to be announced Oct. 13. Other known to be on this year's list are Nelson Mandela and his wife, Win nie, black civil rights campaigners in South Africa: Terry Waite, the missing British Middle East hos tage negotiator: Bob Geldof, the Irish rock singer and organizer of "Live Aid" famine relief for Africa and Kim Dae-jung, the South Kersan opposition politician.

PEOPLE

Among Nobel Nominees

President Corazon Aquino of the

Aquino and Alfonsin

Paul Newman's dream of a comp for children with cancer and other life-threatening diseases got a 55million boost from the government of Saudi Arabia. The contribution will go toward the endowment fand and construction of the camp, e. pected to open in June in Connect cut, Newman said. "I hope that we're worthy of your generosity." Newman told Prince Bandar be Sultan, the Saudi ambassador to the United States, at a Washington press conference.

In Pittsburgh, the tenor Luciana Pararotti said he had shed \$5 pounds (38.6 kilograms) and planned to lose even more. He said he would like to sing the title role in Massenet's "Werther," but Werther is "a man who is dying for love," the singer said, and it's difficult to imagine "a chubby gny like me dying for love, so I have to lose." He declined to disclose by weight but said he wanted to lose 25 more pounds.

Henry Ford 2d left his "clothing jewelry, club memberships, and mobiles and insurance policies" a his widow, Kathleen DuRoss Fo but his will filed Monday in Pan Beach, Florida, gives no details on the disposition of his estimated \$250-million fortune. The will, also named his widow and his son, Fdsel Ford 2d, as his personal representatives, and said that they and unnamed trustees were empowered to handle Ford's business affain. Ford died Sept. 29.
